

Solve or simplify, whichever is appropriate. Circle your final answers.

1. $\frac{5}{x} + \frac{3}{x-2} - \frac{7}{x}$	2. $\frac{4}{x-6} + \frac{3x}{x-2} = \frac{-19}{x^2-8x+12}$
3. $\frac{5}{x} + \frac{3}{x-2} = \frac{7}{x}$	4. $\frac{4}{x-6} + \frac{3x}{x-2}$
5. $\frac{w}{w+2} + \frac{7}{w-5} = \frac{14}{w^2-3w-10}$
