Colleagues,

District Information Technology Services, the campus instructional technologists/designers, and the District Academic Senate invite you to an open lab session to discuss Labster, the new simulation platform provided to the California Community Colleges through June 30. Labster is offering training on the software through their platform and help site, so our mission is to provide secondary support in usage and efficacy. As this is a new technology for most all of the SMCCCD community, we would like to explore the opportunities and obstacles of this technology together, building a repository of information together and learning alongside one another.

Please join us to discuss the way in which Labster can be thoughtfully deployed in your course, recognizing our student-ready commitment with the importance of lab continuation for many courses.

Please find the Zoom details below.

I hope you all are doing well and staying healthy,

Jeramy
