A Strategic Plan for the San Mateo County Community College District

The Strategic Planning Committees of the San Mateo Community College District

9/30/2015

This strategic plan serves as a guide for the San Mateo County Community College District (SMCCCD) through the year 2020.

INTRODUCTION

This Strategic Plan signals a new era for the San Mateo County Community College District (SMCCCD) through the year 2020. It is a vehicle by which the District will embark on progressive goals to match changing times. It replaces the former SMCCCD Strategic Plan covering the years [2008 to 2013](#). The plan consists of three overarching themes – student success, equity, and social justice; four strategic goals; and Districtwide strategies and metrics to be used to implement and measure the effectiveness of programs and activities in support of this plan. This document describes these components and the data used to inform its development.

Development of the District Strategic Plan was spearheaded by two committees: the District Strategic Plan Steering Committee, an executive-level team including members of the Board of Trustees, Chancellor, College Presidents, District Academic Senate, the Deputy and Executive Vice Chancellors of the District and the Director of Government and Community Relations; and the District Strategic Planning Task Force, consisting of the leadership mentioned above, less the Board members and including College Academic Senate leaders and District researchers. The Task Force served to review and inform output from the Steering Committee and manage dissemination of the information about the plan to their constituencies.

The plan's development was data driven and collaborative. Internal and external data regarding trends in demographics, competitors, workforce needs, housing, k-12 and higher education were collected and considered. This plan is integrated with and draws from the District and College plans: Educational Master Plans, Facilities Master Plan, Equity Plans and Strategic Enrollment Plans. Four strategy sessions at each college – a total of 12 forums – provided the opportunity to collect information and insights from faculty, staff and students. The Board of Trustees discussed the plan at their Annual Retreat.

This Strategic Plan will help the District plan wisely for the future. It is tied to the Colleges' Educational Master Plans and to resource allocation. The new resource allocation model includes annual funding for an Innovation Fund to support program development. Additionally, the new plan provides a way for the District to demonstrate its accountability to stakeholders, taxpayers, and students. District leaders will use continuous analysis of student persistence, completion, award of certificates and degrees and transfers in addition to assessing student goal attainment to make strategic decisions. Student performance and outcomes underlie accountability for the overarching District goals-student success and equity and social justice. In addition to the metrics included in Appendix A, the District will develop a District Scorecard that will track various performance measures. These metrics will provide visibility for the achievement of District goals outlined in this document.

This plan will be reviewed regularly and discussed at the Board's Annual Retreat and at other times during the year. The metrics, some of which have yet to be developed, will change over time, as will the strategies as they are reviewed and refined annually

SAN MATEO COUNTY COMMUNITY COLLEGE DISTRICT MISSION STATEMENT

PREAMBLE

The Colleges of the San Mateo County Community College District, Cañada College, College of San Mateo, and Skyline College, recognizing each individual's right to education, provide the occasions and settings, which enable students to develop their minds and their skills, engage their spirits, broaden their understanding of social responsibilities, increase their cultural awareness and realize their individual potential. The District actively participates in the economic, social, and cultural development of San Mateo County. In a richly diverse environment and with increasing awareness of its role in the global community, the District is dedicated to maintaining a climate of academic freedom in which a wide variety of viewpoints is cultivated and shared. The District actively participates in the continuing development of the California Community Colleges as an integral and effective component of the structure of public higher education the State.

MISSION

In an atmosphere of collegiality and shared responsibility, and with the objective of sustaining open access for students and being responsive to community needs, the Colleges of the San Mateo County Community College District will fulfill the following mission with excellence:

- Provide a breadth of educational opportunities and experiences which encourage students to develop their general understanding of human effort and achievement; and
- Provide lower division programs to enable students to transfer to baccalaureate institutions; and
- Provide career and technical education and training programs directed toward career development, in cooperation with business, industry, labor, and public service agencies; and
- Provide basic skills education in language and computational skills required for successful completion of educational goals; and
- Provide a range of student services to assist students in attaining their educational and career goals; and
- Provide self-supporting community education classes, contract education and training and related services tailored to the human and economic development of the community; and
- Provide leadership in aligning educational programs and services offered by all local educational institutions and community service organizations; and
- Celebrate the community's rich cultural diversity, reflect this diversity in student enrollment, promote it in its staff, and maintain a campus climate that supports student success.

To fulfill this educational mission, the District is committed to effective institutional research that supports the evaluation and improvement of programs, services, and student outcomes. Shared governance is practiced through processes that are inclusive with regard to information sharing and

decision-making, and that are respectful of all participants. The District plans, organizes and develops its resources to achieve maximum effectiveness, efficiency, equity and accountability.

The Mission Statement is evaluated and revised on a regular basis.

The San Mateo County Community College District Board of Trustees commits itself to the following Core Values and Principles:

- **Student-Centered Mission:** The Board recognizes each individual's right to education and commits itself to providing the occasions and settings that will allow our students to develop their minds and skills, engage their spirits, broaden their understanding of social responsibilities, increase their cultural awareness and realize their individual potential. The Board recognizes that our core mission is to provide transfer education and career/technical training to as many students as possible. Basic skills classes which are focused on preparing our students for our core mission courses as noted above are also necessary and appropriate.

Lifelong learning classes which had long been an important part of the community college mission were necessarily curtailed during difficult budget years. The Board asserts that, given the District's financial outlook at this time, the College should consider restoring some of these programs - through contract education, not-for-credit programs, community education and hybrid community education/credit courses.

In order to insure that all programs and courses offered remain relevant, necessary and are serving student needs, the District's programs and classes should be regularly examined and updated based upon student, employer and community need as determined through surveys, focus groups and other measurements.

Student support services and staff are also important and help ensure the success of our students in their pursuit of a postsecondary education. The Board is committed to providing a wide array of student services that are necessary and that support student success and that do not unnecessarily duplicate services offered in the community.

- **Support for Innovation/Expanding Educational Opportunities:** The Board believes that its long-standing support for innovation and creative approaches to serving the educational needs of the community has been essential to ensure that the Colleges are offering the appropriate balance of academic programs and in maintaining the academic excellence of these programs. With the changed financial status of the District, the Board encourages the Colleges to seek out underserved populations; evaluate their educational needs and provide courses and programs to serve them. Using the Business and Community Needs Assessment data, the Board also encourages the Colleges to provide new classes, certificate programs or AA/AS degrees that will meet those identified needs. The Colleges should also continue efforts to expand programs that extend access to new populations of

students, many of whom cannot attend traditional college classes. Finally, the Board is interested in maintaining/expanding unique programs at the Colleges that serve broad community needs and draw that community to our campuses.

- **Employment Philosophies:** The Board subscribes to the principles of human resource management which promote: equal access; equal opportunity; equal treatment and fairness; staff development and training opportunities; competitive compensation that draws the best candidates to the District; and accountability. The Board reaffirms the long-standing District policy that it always seeks to employ the most qualified applicant for each job and does not make decisions about employment, retention, compensation, promotion, termination or other employment status which would discriminate on the basis of national origin, religion, age, gender identity, gender expression, race or ethnicity, color, medical condition, genetic information, ancestry, sexual orientation, marital status, physical or mental disability, pregnancy or because they are perceived to have one or more of the foregoing characteristics, or based on association with a person or group with one or more of these actual or perceived characteristics.
- **Participatory Governance:** The Board is deeply committed to the participatory governance process as it has been established in this District, and believes that this process can produce decisions that are comprehensive, fair and in the best interests of students, the community and employees. The Board encourages and expects the participation of all constituents in decision-making and governance and recognizes participatory governance as the means for having the voices and opinions of various constituencies heard.
- **Final Decision-Making Authority:** In this participatory governance environment, the Board, as the elected representatives of the people of San Mateo County, will ultimately make the final decision and sets policy on issues based upon what it believes is in the best interests of the District as a whole. In reaching its decisions, the Board acts independently, but considers the informed viewpoints of all participants and constituencies and relies on the research, advice, experience and expertise within the District.

The Board believes that adherence to these core values and operating principles will allow the District to be one of the most innovative and progressive in the State, and that these values and principles will continue to support the District and advance the interests of students, faculty, staff and the San Mateo County community.

OVERARCHING THEMES

This summary of the District Strategic Plan lays out the major components of the plan and a summary of the principles, themes and data used to establish its goals, strategies and metrics.

STUDENTS FIRST: STUDENT SUCCESS, EQUITY AND SOCIAL JUSTICE

Success, Equity and Social Justice for our students are longstanding goals of the San Mateo County Community College District and are the overarching themes of the District's Strategic Plan. With this Plan, the District recognizes that there is nothing more important to the District's future and to the future of San Mateo County than increasing student success rates. In addition to student access, student success is crucial to closing longstanding gaps in student attainment. Continuous usage of the District's data and evidenced based practices will be required to identify and close these gaps. While colleges are required to report success data to external agencies, these traditional measures of student completion and graduation do not fully capture the contributions of the District's Colleges to the County. A more student-centric definition of student success is necessary. Accordingly, the District defines student success as occurring when students reach the individual goals they set for themselves.

The District and the three colleges of the district consider the needs and best interest of students in decision-making and resource allocation. This **"students-first"** philosophy complemented the belief that diversity is a value added rather than something to be overcome or transcended and is a necessary starting point rather than the entire goal. In order to create an equitable and rigorous educational environment, the value of social justice must be embedded in policy and practice, be reflected throughout the District and its guiding plans, and must address equitable impact as well as intent. Social justice is a complex theory with broad meaning much beyond the scope of this Strategic Plan. For our purposes, it is understood to be a value of equal access to liberties, rights, and opportunities with attention to low resourced members of our society.

To ensure that adequate resources are available to achieve the goals of this Strategic Plan, the District will, at all times, undertake sound fiscal planning and management of allocations. It will be essential for the District to protect its community-supported revenue status through advocacy, education and alliances with other similarly funded colleges. In addition, the District will need to continue to support and expand entrepreneurial efforts that produce additional revenue that can be used to support student educational programs and services beyond that which is available from other state and local sources.

DISTRICTWIDE STRATEGIES

The following strategies will help inform the District and Colleges in developing policies, procedures and initiatives in support of the overarching themes of this Strategic Plan.

- Develop a robust and comprehensive research, planning and institutional effectiveness infrastructure Districtwide to produce actionable data for use in Districtwide decision-making.

- Measure the impact of new and existing College efforts to increase success and equity for all students. Close gaps that result in inequitable outcomes.
- Capture the real education goals that students want to achieve and use these goals to determine their subsequent success.
- Continually explore and implement interventions that benefit all students, with particular emphasis on students with high potential and limited resources.
- Provide clear and distinct pathways for all students, particularly those from underserved populations, to accelerate program completion and successful transitions to work or transfer.
- Support the Colleges by providing resources for teaching and support innovations that are designed to increase student success.
- Review student placement assessment processes and incorporate multiple measures of assessing the preparedness of new students for college level work for students with the goal of decreasing time needed to achieve one's goal.
- Engage in innovative course scheduling that provides more student options for course completion.

STRATEGIC GOALS, METRICS AND STRATEGIES

The Strategic Plan defines **Strategic Goals** that will help the District meet its commitment to achieving success, social justice, and equity for our students. Each strategic goal will be accompanied by **metrics** that measure whether the plan is working. Draft metrics are included in Appendix A. These metrics are placeholders until we can better define metrics for each goal. A number of **Districtwide strategies** that define, in broad terms, the means of achieving the strategic goals are also included. *Operational planning* at the Colleges will translate the Districtwide strategies into College-specific programs and activities that support the strategic goals. Systematic assessment of College programs and activities will inform the metrics for the District's strategic goals and guarantee transparency and accountability for District employees and the public. By implementing this plan, the District and Colleges will be accountable to the students they serve and the communities of San Mateo County.

STRATEGIC GOAL #1: DEVELOP AND STRENGTHEN EDUCATIONAL OFFERINGS, INTERVENTIONS, AND SUPPORT PROGRAMS THAT INCREASE STUDENT ACCESS AND SUCCESS

Students arrive at District Colleges with a range of educational goals. Students and the public need to know that their investment in time and money in their education will lead to tangible results. Accordingly, the District will seek to provide the best possible balance of programs and services that will result in clear transfer outcomes as well as alignment with emerging labor markets. Increasing student outcomes requires increased support and engagement and professional development that focuses on excellence in teaching.

DISTRICTWIDE STRATEGIES

- Increase the number of students who utilize support services that enable them to stay in school and succeed.
- Systematically evaluate the effectiveness of existing programs in all areas and develop, strengthen or eliminate programs to support student success.
- Strengthen the alignment of career and technical programs with projected workforce needs.
- Provide professional development resources for faculty, staff, and administration to ensure program viability and excellence in teaching.
- Create on-line and web-based options for students to access advising and counseling services, interactive scheduling, and educational plans.
- Establish a dedicated budget for program development (including personnel, professional development, and technology). Invest in resources and support actions that will ensure quality teaching and learning.
- Use emerging practices to accelerate student progression through basic skills and ESL sequences into college-level work.
- Expand the globalization of education as a critical means for graduates to engage and thrive in an increasingly small world.

STRATEGIC GOAL #2: ESTABLISH AND EXPAND RELATIONSHIPS WITH SCHOOL DISTRICTS, 4-YEAR COLLEGE PARTNERS, AND COMMUNITY-BASED ORGANIZATIONS TO INCREASE HIGHER EDUCATION ATTAINMENT IN SAN MATEO COUNTY

The District's Colleges are the center of higher education opportunity for San Mateo County. Yet, past successes are no guarantee of future enrollment. It is unlikely that service area demographics during the current planning period can ensure continually increasing enrollments. It will be increasingly important to work with education partners and community-based organizations to ease students' transitions to, within, and from the District's Colleges.

DISTRICTWIDE STRATEGIES

- Support seamless transitions to College for secondary school students.
- Increase Middle College and Early College opportunities.
- Make concurrent and dual enrollment processes more efficient and accessible for secondary schools and their students.
- Work with feeder high schools to develop better placement processes that result in higher levels of students placed into college credit courses and programs.
- Emphasize and support both traditional and non-traditional contact with instructors and counselors.

- Expand student services, student clubs and learning communities for the benefit of all students but especially underrepresented or other at-risk students.
- Increase and articulate visible pathways for transfer and job placement to help students meet their stated goals.
- Increase/expand partnerships with four-year colleges and universities to increase seamless curriculum alignment and direct program transfer.
- Create faculty-to-faculty exchanges with high school discipline counterpart faculty to better align curricula and to create seamless transitions from secondary to postsecondary education.

STRATEGIC GOAL #3: INCREASE PROGRAM DELIVERY OPTIONS, INCLUDING THE EXPANDED USE OF INSTRUCTIONAL TECHNOLOGY, TO SUPPORT STUDENT LEARNING AND SUCCESS

In an educational environment, that has become highly competitive, students and prospective students have many choices for higher education. Prospective adult learners are increasingly unlikely to enroll for semester-long classes, seeking instead shorter-term and online learning opportunities. Many younger students are digital natives and expect higher education to incorporate the customer experiences provided by successful online retailers. Recent national practices in Learning Communities, peer tutoring, and retention can also contribute to student success rates. Innovations can spur larger enrollments and retention rates as well as higher levels of student success and satisfaction with the District’s educational offerings. Technology will also provide access for populations currently unable to access the District’s programs and support services. The District recognizes that such transformations require both the technological infrastructure and professional development to take advantage of new opportunities.

DISTRICTWIDE STRATEGIES

- Expand program delivery options, including accelerated completion options, for all students including online students, e.g., College for Working Adults; short-term classes; intersession classes; cohort classes; and continuing, corporate and community education.
- Develop a strategic distance education plan to increase the development and delivery of quality, fully online and hybrid classes and degree programs.
- Support professional development for faculty and staff to incorporate advances in teaching, learning, and effective use of technology.
- Increase technology use in the classroom and develop the overall District technology infrastructure to improve student success.
- Share data and information, especially about student success, with community partners.
- Integrate technological systems to ensure a seamless and efficient experience for students and staff.
- Ensure student services are addressing the needs of all students including online students.

STRATEGIC GOAL #4: ENSURE NECESSARY RESOURCES ARE AVAILABLE TO IMPLEMENT THIS STRATEGIC PLAN THROUGH SOUND FISCAL PLANNING AND MANAGEMENT OF ALLOCATIONS. PROTECT COMMUNITY-SUPPORTED STATUS AND UNDERTAKE THE DEVELOPMENT OF INNOVATIVE SOURCES OF REVENUE THAT SUPPORT EDUCATIONAL PROGRAMS BEYOND THAT WHICH IS AVAILABLE FROM COMMUNITY AND STATE ALLOCATIONS.

Many initiatives to improve student success can be achieved within existing resources. At the same time, new resources generated from the District's entrepreneurial actions will add significantly to those resources available to increase student success. Entrepreneurial actions will draw upon new and existing partnerships throughout the County as well as the state, nation, and internationally. As the District embarks on the strategies in this plan, it is critical that the additional resources be invested in innovation, faculty and staff development, and other productive actions that result in higher levels of student success, social justice and equity.

DISTRICTWIDE STRATEGIES

- Review allocations so that they align with District goals and strategic actions.
- Protect and solidify District funding, predominately in the form of property taxes, through interaction and advocacy with key county and state legislators and the State Chancellor's Office. To ensure this is achieved, build coalitions among other community-supported districts and statewide associations.
- Increase entrepreneurial actions across the District to provide new revenue sources.
- Increase Community, Continuing and Corporate Education (CCCE) training and services to San Mateo County residents, families and businesses through increased lifelong learning and professional certifications for adults, expanded academic and fitness programming for youth, and customized workforce training for public and private-sector organizations.
- Increase revenue-generating contract training for public and private sector organizations.
- Develop internationally recognized, revenue-generating Intensive English Programs for students, educators, administrators and executives.
- Contribute to the economic development of San Mateo County through collaborative partnerships with industry and workforce/economic development agencies.
- Increase credit-based enrollments through new credit/non-credit hybrid programming.
- Create or expand revenue-generating programs such as Study Abroad, San Mateo Athletic Club, and Tech Shop.
- Increase grant writing capability throughout the District.
- Link the District's community and international education efforts to create synergies that strengthen both programs.

STRENGTHS WEAKNESSES OPPORTUNITIES AND THREATS (SWOT) ANALYSIS

A SWOT analysis is a listing and/or description of a project’s or proposal’s strengths, weaknesses, opportunities and threats relative to the competitors. For SMCCCD, this SWOT analysis is a consideration of the District within its environment of San Mateo County, and to the larger extent, the State of California, and the initiatives proposed by this Strategic Plan.

| | |
|---|--|
| <p>Strengths</p> <ul style="list-style-type: none"> • Community-supported status • Administration, faculty and staff • Culture of cooperation and innovation • Relationships with communities (schools, cities, civic organizations) | <p>Weaknesses</p> <ul style="list-style-type: none"> • Insufficient funds for everything we want to do • Anticipated retirement of seasoned employees |
| <p>Opportunities</p> <ul style="list-style-type: none"> • International student growth • Community and corporate ed growth • CTE transitions with Adult Ed • Early College High School | <p>Threats</p> <ul style="list-style-type: none"> • Legislation that harms the District • Competition for international students |

STRENGTHS

The District is in the enviable position of having attained community-supported status. This means that the District’s property taxes and student fees combined exceed the revenue limit determined by the State. The District gets to keep the additional funds. While not making the District wealthy, it does afford the District the ability to do some activities that would otherwise not be possible. It also makes our revenue more predictable and stable.

The current administration, faculty and staff bring a tremendous amount of expertise to the District. In addition, the tenure of the senior administration and much of the faculty means that the wealth of knowledge and experience is significantly more than in districts with younger and/or less experienced employees.

This District has a culture of cooperation that comes from the very top all the way through line staff. All of the administration meets monthly; the faculty has discipline meetings between the campuses annually; and the staff work in teams across the campuses to develop procedures that create a uniform experience for students. The District strives to innovate and try out new ideas and is willing to take risks. The Board of Trustees has met with other school boards and city councils to address topics such as a joint early college high school and transportation problems. Skyline College held a one-day workshop with local

community, board and council members on “The Last Mile” addressing transportation issues at Skyline College. College of San Mateo staff is meeting regularly with representatives of their feeder high schools to share placement information and develop curriculum. Cañada College is leading the District’s participation in the Adult Education Coalition in the County. College administration and staff engaged with local employers and workforce professionals to assess skills and training needs for the local workforce. This activity informs college program offerings.

WEAKNESSES

Despite having attained community-supported status, the District is experiencing strains on the budget. There is a pent-up pressure to increase compensation, and the PERS and STRS rate increases are adding significant additional expense to the compensation budget. The District chose to pursue and pass a bond that was smaller than needed as indicated by the Facilities Master Plan. The new initiatives that are driven in part by this Strategic Plan also need additional funding. The District will not be able to complete all of its initiatives in the time frame desired.

As noted in Appendix B, a large proportion of our faculty are over 56 – within retirement age – and there are certain disciplines in which most if not all faculty will be replaced in the near term. Similarly, the average age of administration is 53. This anticipated turnover in employees, while providing opportunities for some individuals, also stresses the organization.

OPPORTUNITIES

The District’s international student headcount has increased from 179 in 2011/12 to a projected 720 in 2015/16 through a concerted recruitment effort. The increase in international students brings many benefits to the District, including funding for additional sections for resident students and professional development funds to globalize the curriculum, as well as covering all of the program’s direct and indirect costs. We anticipate the growth to continue at 30% to 50% annually.

The Community, Corporate and Continuing Education program has been revitalized and is exploring education programs for businesses and the general community that brings in additional resources for the District, brings community members onto the campuses, and promote awareness of and appreciation for the Colleges. We anticipate significant growth in community education as well as a brand new program of corporate education.

CTE is a program of study that involves a multiyear sequence of courses that integrates core academic knowledge with technical and occupational knowledge to provide students with a pathway to postsecondary education and careers. SMCCCD’s CTE “Transitions,” is a coordinated program between the San Mateo County High Schools/San Mateo County Office of Education Regional Occupational Program (SMCOE ROP)/Job Train and the San Mateo County Community College District (SMCCCD) to

allow high school students to take “articulated” (comparable) classes in high school/SMCOE ROP/Job Training and receive both high school and college units. The focus of the articulated classes is to blend technical skills with traditional academics for improved future-ready career opportunities. The San Mateo County Community College District currently has more than 70 articulation agreements in more than 10 career majors with most of the high schools in San Mateo County, the SMCOE ROP, Job Train and Goodwill.

California is on track to face a shortage of 2.3 million college graduates needed to meet the state’s workforce demands in 2025. Through the District’s entrepreneurial actions and CTE Transitions, we believe we will draw upon new and existing partnerships throughout the County as well as the state and nation. The goal is not only to address future workforce demands, but also to develop a more comprehensive CTE Transitions program that will give high school students greater exposure to SMCCCD professors, programs and services. This work is in progress as the Board of Trustees has met with the Sequoia Union High School District Board of Trustees to explore a joint effort in creating an Early College High School. The Chancellor is meeting with the SUHS Superintendent on an ongoing basis to develop the plans for this program. It is a very exciting venture that will meet many of the goals of this Strategic Plan.

THREATS

The District is continually monitoring proposed legislation that could affect the District’s community supported status, as well as other legislation that could affect how the District operates or the funding the District receives. The District supports staff participation in statewide boards and councils that help develop Chancellor’s Office policies and procedures and guide the conversation around District-critical issues.

Despite the District’s rapid growth in international student numbers, there is significant competition for international students. In particular, two of the largest community college programs in the state are nearby at Foothill-De Anza and Diablo Valley College. The District will need to continue to be innovative in reaching out to high schools (which neither competitor had done before our District began doing so) and developing relationships and contracts with agents that send students to our district as opposed to our competitors.

SUMMARY OF DATA TRENDS AND THEIR IMPLICATIONS FOR THE PLANNING PROCESS

Development of this Strategic Plan was a data-driven process. An environmental scan was conducted to assess external and internal factors that will likely have implications for the District currently and well into the future. Internal, local, regional, state and national data describing demographics, the workforce, housing, education and education policy was collected and analyzed. A complete description of the environmental scan data is included in Appendix B.

Examination and further analysis of the environmental scan data revealed several trends that will have implications as to how the District can best continue its “Students First” philosophy through advancing its overarching themes of student success and social justice and equity. A summary of the implications revealed by this data collection and analysis process is shown below. The District’s four Strategic Goals directly address these implications. The link between each particular implication and the particular Strategic Goal(s) that is addressed in response to the implication is also shown. A detailed description of the trend analysis that led to these implications appears in Appendix A of this document.

PLANNING ASSUMPTIONS

Development of the strategic goals and strategies was informed by a data-driven process and guided by a set of **planning assumptions**. Planning assumptions are statements that shape the planning process and create a shared future vision. The success of current and future learners is paramount.

- The District is committed to being a central hub of intellectual, cultural, social, economic, and health and wellness programs and services that attract the San Mateo County community members to our campuses.
- Access and student equity are key values that drive development of academic programs and student services. Educational delivery modes must address the needs of all students, including underserved and underrepresented populations.
- The Colleges will continue to deliver relevant, timely, and effective programs for transfer and degree attainment, career and technical certification, workforce development, and the acquisition of basic skills necessary to pursue higher learning.
- The District will explore means to create additional clear and efficient pathways for students to achieve their educational aspirations.
- The District promotes the seamless integration of education at all levels—from K-12 through higher learning—and will actively pursue initiatives to eliminate unnecessary barriers.

IMPLICATIONS OF DEMOGRAPHIC TRENDS

Population growth has slowed amid the County's relative affluence and educational attainment. Slow growth means that the District and its Colleges will need to increase take rates and continually revise and renew program options to maintain current enrollment levels. High-income households may not view community college education as a first choice. At the same time, there are persistent pockets of poverty within San Mateo County. The number of youth who speak languages other than English will increase. Programs and partnerships focused on the success of low-income students and students of color will be of critical importance. Similarly, the increasing proportion of older citizens and their preferences for learning will be a challenge. These trends require evaluation of the District's current array of programs, classes, and scheduling options as well as student support programs. Matching educational offerings to new needs based on an understanding where gaps exist is critical to the District's future.

Associated Goals

Goal #1 – Develop and strengthen new educational offerings, interventions, and support programs that increase student access and success.

Goal #2– Establish and expand relationships with school districts, 4-year college partners, and community based organizations to increase higher education attainment in San Mateo County.

IMPLICATIONS OF WORKFORCE TRENDS

There is a commercial real estate boom underway in the County owing in part to its location in the middle of the Silicon Valley. Propelled by technology and innovation, Silicon Valley and the Peninsula create both opportunity and challenges for the District, especially in matching employer needs for qualified workers and in preparing students to advance in the workforce. The number of "middle jobs" appears to be declining, placing a premium on those individuals with skills and leaving behind those without. Even

PLANNING ASSUMPTIONS

- Through contract education and community education, as well as other program modes, the District is committed to serve the lifelong learning and personal enrichment needs of County residents.
- The District will attract and hire the very best faculty and staff.
- The District will continue to provide robust professional development opportunities that keep employees current in their fields of study and practice.
- The District and Colleges will actively pursue a variety of strategies to assure the ongoing fiscal integrity of the operation, including new resource development.
- The District will continue to modify, renew and/or rebuild facilities and technology to support effective teaching and learning in the 21st Century.
- The District values collaboration with other organizations in the community that support student success and educational attainment.
- The District and its Colleges will continue to be accountable to taxpayers for effective deployment of resources.
- The District is committed to monitoring and reviewing its progress towards the accomplishment of Strategic Planning goals.

with an unemployment rate well below the state average, pockets of unemployment persist in the County. Amid these changes, continued deep collaboration with business and industry to provide needed training and skills upgrades for current employees will be increasingly important.

Associated Goals

Goal #1 – Develop and strengthen new educational offerings, interventions, and support programs that increase student access and success.

Goal #3– Increase program delivery options including the expanded use of instructional technology, to support student learning and success.

Goal # 4– Ensure necessary resources are available to implement this strategic plan through solid fiscal planning and management of allocations. Protect community-supported status and undertake the development of innovative sources of revenue that support educational programs beyond that which is available from community and state allocations.

IMPLICATIONS OF HOUSING TRENDS

Home ownership costs are high meaning that young families may be unable to relocate to San Mateo County without sufficiently high levels of income typically brought about by accompanying high levels of education. As the population ages in the County and as available land increases in cost, an increasing proportion of new construction will be in multi-unit structures. As the housing market, especially in places where rental costs are high, squeezes lower-income families disposable income for education and tuition may decline, making it more difficult for the District to increase its penetration rate for this key demographic.

Associated Goals

Goal #3-Increase program delivery options including the expanded use of instructional technology, to support student learning and success.

Goal # 4–Ensure necessary resources are available to implement this strategic plan through solid fiscal planning and management of allocations. Protect community-supported status and undertake the development of innovative sources of revenue that support educational programs beyond that, which is available from community and state allocations.

GLOSSARY OF PLANNING TERMS

Strategic Goals are overarching goals, which establish broad directions and do not tend to change over time. In fact, goals can be carried over from one planning cycle to the next with only minor modification. Strategic goals are fundamental issues that the District must address. Strategic goals are desired ends, which are not necessarily attainable or quantifiable.

Strategies are a means of achieving, or moving toward, a strategic goal. Sometimes called “objectives” or “initiatives,” strategies are measurable and quantifiable. They focus efforts on demonstrable results and provide broad categories for resource allocation. Strong strategies are SMART: Specific, Measureable, Attainable, Realistic, and Time-Based.

Metrics, also known as “progress measures,” “evaluation measures,” or “targets,” are specific performance targets that address strategic goals and are stated in terms of measurable and verifiable outcomes.

Benchmarking is the process of continuously comparing and measuring an organization against recognized leaders, other colleges, and its own performance to gain information that can help the District take action to improve its performance. By comparing metrics, judgments can be made about performance and where to direct human and financial resources. Benchmarks are typically adjusted annually after implementation to reflect changing circumstances and organizational learning.

IMPLICATIONS OF COMMUNITY COLLEGE TRENDS

Enrollment growth in community colleges nationwide has stabilized or declined as the national economy improves. Competition for students will increase as a result. Besides the three Colleges within the District, there are ten community colleges operating in the area. A [Competitor Analysis](#) documents their program arrays and will be a strategic factor as the District explores strengthening existing programs and creating new programs based on market needs and demographics. The increasing proportion of students entering college with skills deficits will require new responses including mandatory scheduling and advising to increase student success and retention.

Associated Goals

- Goal #1 – Develop and strengthen new educational offerings, interventions, and support programs that increase student access and success.
- Goal #2– Establish and expand relationships with school districts, 4-year college partners, and community based organizations to increase higher education attainment in San Mateo County.
- Goal #3– Increase program delivery options, including expanded use of technology, to support student learning and success.
- Goal # 4–Ensure necessary resources are available to implement this strategic plan through solid fiscal planning and management of allocations. Protect community-supported status and undertake the development of innovative sources of revenue that support educational programs beyond that, which is available from community and state allocations.

GLOSSARY OF PLANNING TERMS

Implementation plan. An implementation plan makes the strategic plan real by turning its goals into a working plan. Sometimes called an “operational” or “action” plan, the implementation plan needs to be directive, clear, and documented. Implementation plans are created at or near the end of a strategic planning process.

Implementation plans are not necessarily intended for public consumption and are not usually shared with governing boards. The primary reason is that, unlike the strategic plan, the implementation plan is revised, amended, and changed frequently to respond to environmental factors.

Implementation plans identify resources each strategy will require. Resources include not just dollars, but people, time, space, and technology. Frequently strategies found in an implementation plan are “no cost” since they involve the redirection of employee time. Operational plans to implement these strategies are embedded in the Colleges’ Educational, Enrollment and Equity plans.

IMPLICATIONS OF STATE EDUCATION POLICY TRENDS

It is likely that the California Legislature will continue to develop new policies that will impact the District and its operations. Especially prominent will be policies intended to increase student transfer and completion. Accreditation is the most recent area targeted for legislative intervention.

Associated Goals

Goal #1 – Develop and strengthen new educational offerings, interventions, and support programs that increase student access and success.
Goal #2– Establish and expand relationships with school districts, 4-year college partners, and community based organizations to increase higher education attainment in San Mateo County.

Goal #3-Increase program delivery options including the expanded use of instructional technology, to support student learning and success.

Goal # 4–Ensure necessary resources are available to implement this strategic plan through solid fiscal planning and management of allocations. Protect community-supported status and undertake the development of innovative sources of revenue that support educational programs beyond that, which is available from community and state allocations.

IMPLICATIONS OF K THROUGH 12 TRENDS

K-6 enrollments throughout the County will not increase at the same rate as secondary enrollments, signaling a future declining recruitment pool for the District. The dropout rate for students of color in secondary schools is significantly higher than the rate for white students. Since high school, graduates entering the District’s Colleges enroll primarily on a full-time basis, changes in penetration rates will need to be closely monitored and new pathways built to provide enrollment stability. Pathways to the District’s Colleges that are established in middle and secondary schools will be increasingly important.

Associated Goals

Goal #2– Establish and expand relationships with school districts, 4-year college partners, and community based organizations to increase higher education attainment in San Mateo County.

Goal # 4–Ensure necessary resources are available to implement this strategic plan through solid fiscal planning and management of allocations. Protect community-supported status and undertake the development of innovative sources of revenue that support educational programs beyond, which is available from community and state allocations.

IMPLICATIONS OF NEW EDUCATIONAL PARADIGMS

Educational technology has evolved dramatically over the past two decades, causing higher education institutions to rethink how and when to deliver courses and programs. Learners everywhere—especially in the Silicon Valley—are likely to have high expectations for the use of technology in courses and support services. Similarly, competency-based learning approaches can help develop accelerated pathways for certificate and degree attainment that are important to students and employers.

Associated Goals

Goal #3-Increase program delivery options including the expanded use of instructional technology, to support student learning and success.

Goal # 4–Ensure necessary resources are available to implement this strategic plan through solid fiscal planning and management of allocations. Protect community-supported status and undertake the development of innovative sources of revenue that support educational programs beyond that, which is available from community and state allocations.

SMCCCD STRATEGIC PLAN METRICS DEFINITIONS

These metrics are under development and will be revised over time.

| | Strategic Goal #1: Develop and strengthen educational offerings, interventions, and support programs that increase student access and success |
|-------|---|
| 1.1 | The proportion of First-time students in the Fall term who indicate an informed Ed Goal (SS01 = A,B,C or E) degree, certificate or transfer. |
| 1.2 | The proportion of First-time students in the Fall term who indicate an informed Ed Goal (SS01 = A,B,C or E) degree, certificate or transfer who enroll in below transfer level English and/or Math in their first academic year who subsequently successfully complete transfer level course work in that area. |
| 1.3 | The proportion of students who earn an “A,B,C,CR, or P” out of the total number of students who complete with and “A,B,C,D,F,W,CR,NC,P, or NP.” |
| 1.3.1 | The proportion of students who earn an “A,B,C,CR, or P” out of the total number of students who complete with and “A,B,C,D,F,W,CR,NC,P, or NP” in face-to-face (F2F) courses. |
| 1.3.2 | The proportion of students who earn an “A,B,C,CR, or P” out of the total number of students who complete with and “A,B,C,D,F,W,CR,NC,P, or NP” in distance education (DE) courses, excluding hybrid courses. |
| 1.4 | The number of First-time students in the Fall term who indicate an informed Ed Goal (SS01 = A,B,C or E) and subsequently enroll in Transfer Level English in their first academic year. |
| 1.5 | The number of First-time students in the Fall term who indicate an informed Ed Goal (SS01 = A,B,C or E) and subsequently enroll in Transfer Level Math in their academic year. |
| 1.6 | Identify students who complete an initial associate degree. Look back six years to identify first term of enrollment. Determine the average number of terms (Fall, Spring, and Summer included) it took to complete the award. |
| 1.7 | Identify students who complete a certificate of achievement. Look back six years to identify first term of enrollment. Determine the average number of terms (Fall, Spring, and Summer included) it took to complete the award. |
| 1.8 | Identify students who complete a certificate of specialization. Look back six years to identify first term of enrollment. Determine the average number of terms (Fall, Spring, and Summer included) it took to complete the award. |
| 1.9 | Identify students who transfer to a four-year institution of higher education. Look back six years to identify first term of enrollment. Determine the average number of terms (Fall, Spring, and Summer included) it took to complete transfer. |

| | |
|-----|---|
| | Strategic Goal #2: Establish and expand relationships with school districts, 4-year college partners, and community-based organizations to increase higher education attainment In San Mateo County |
| 2.1 | Using the US Census Bureau American Community Survey (ACS) one-year estimate, the sum of the proportions of San Mateo County adults aged 25+ who have attained an associate, bachelor's, graduate or professional degree. |
| 2.2 | Using the US Census Bureau American Community Survey (ACS) one-year estimate, the proportions of San Mateo County adults aged 25+ who have attained an associate degree. |
| 2.3 | The proportion of SMCCCD high school graduates who successfully transition to postsecondary education within the first year following graduation. |
| 2.4 | The proportion of SMCCCD students. |
| 2.5 | The number of certificates awarded annually in the District. |
| 2.6 | The number of associates degrees awarded annually in the District. |
| 2.7 | The number of students who transfer to in-state private or out-of-state four-year post-secondary institutions of higher learning annually. |
| 2.8 | The number of students who transfer to the California State University (CSU system) annually. |
| 2.9 | The number of students who transfer to the University of California (UC system) annually. |

| | |
|-----|--|
| | Strategic Goal #3: Increase program delivery options, including the expanded use of instructional technology, to support student learning and success |
| 3.1 | The number of students annually who complete an initial associate degree that includes at least one successfully completed distance education course (excluding hybrid). |
| 3.2 | The number of students annually who complete a certificate that includes at least one successfully completed distance education course (excluding hybrid). |
| 3.3 | Number of associate degrees completed annually where 100% of the coursework was delivered via distance education (excluding hybrid). |
| 3.4 | Number of certificates completed annually where 100% of the coursework was delivered via distance education (excluding hybrid). |

| | |
|-----|--|
| | Strategic Goal #4: Ensure necessary resources are available to implement this strategic plan through sound fiscal planning and management of allocations. Protect community-supported status and undertake the development of innovative sources of revenue that support educational programs beyond that, which is available from community and state allocations. |
| 4.1 | The amount of revenue generated each fiscal year from specified efforts, including Grants, Contract Education, Community Education, International Student Enrollment, Facilities Rentals, and Athletic Clubs. |

APPENDIX A: METRICS

METRICS [FINAL METRICS, BENCHMARKS AND TARGETS TO BE DETERMINED]

Note: Metrics will be calculated on cohorts of entering first-time students and disaggregated by student education goals to include race/ethnicity, gender, and socioeconomic status (Pell Recipients) to identify and address gaps in student success.

| <u>Metric – Goal 1</u> | <u>2010-11</u> | <u>2011-12</u> | <u>2012-13</u> | <u>2013-14</u> | <u>Baseline 2014-15</u> | <u>Target 2019-20</u> |
|---|----------------|----------------|----------------|----------------|-------------------------|-----------------------|
| 1.1 Increase the proportion of students who complete a Student Educational Plan (SEP) indicating a goal of degree, certificate or transfer. | - | - | - | - | NA | +5% |
| 1.2 Increase the proportion of students who complete a Student Educational Plan (SEP) indicating a goal of a degree, certificate or transfer who started below transfer-level and completed a transfer-level course in the same discipline. | - | - | - | - | NA | +5% |
| 1.3 Increase the proportion of students who successfully complete a course by earning a grade of “C” or better or “credit.” | 68.7 | 70.0 | 69.8 | 69.7 | - | +1% |
| 1.3.1 Increase the proportion of students who successfully complete a face-to-face (F2F) course by earning a grade of “C” or better or “credit.” | 69.6 | 71.0 | 70.9 | 70.8 | - | +1% |
| 1.3.2 Increase the proportion of students who successfully complete a Distance Education (DE) course by earning a grade of “C” or better or “credit.” | 56.7 | 59.0 | 59.0 | 60.8 | - | +10% |
| 1.4 Increase the proportion of First-time students who complete a Student Educational Plan (SEP) indicating a goal of a degree and/or transfer who enroll in transfer-level coursework in English. | - | - | - | - | NA | +10% |
| 1.5 Increase the proportion of First-time students who complete a Student Educational Plan (SEP) indicating a goal of a degree and/or transfer who enroll in transfer-level coursework in Math. | - | - | - | - | NA | +10% |
| 1.6 Decrease the time to completion for associate degrees. | - | - | - | - | XX Terms | -20% |
| 1.7 Decrease the time to completion for transfer. | - | - | - | - | XX Terms | -20% |
| 1.8 Decrease the time to completion for certificates of achievement. | - | - | - | - | XX Terms | -20% |
| 1.9 Decrease the time to completion for certificates of specialization. | - | - | - | - | XX Terms | -20% |

| <u>Metric – Goal 2</u> | <u>2010-11</u> | <u>2011-12</u> | <u>2012-13</u> | <u>2013-14</u> | <u>Baseline 2014-15</u> | <u>Target 2019-20</u> |
|--|----------------|----------------|----------------|----------------|-------------------------|-----------------------|
| 2.1 Increase overall post-secondary educational attainment of San Mateo County adults. | 50.6% | 50.3% | 51.4% | 53.6% | - | +1% |
| 2.2 Increase associate degree attainment of San Mateo County adults. | 7.6% | 7.2% | 7.7% | 7.6% | - | +1% |
| 2.3 Increase the proportion of San Mateo County high school graduates who successfully transition to postsecondary education. | - | - | - | - | NA | +5% |
| 2.4 Increase proportion of San Mateo County high school graduates who enroll in the District. | NA | NA | 54.3% | 48.9% | - | +5% |
| 2.5 Increase the number of Certificates awarded. | 1474 | 1394 | 1623 | 1927 | - | +10% |
| 2.6 Increase the number of associates degrees awarded. | 1129 | 1442 | 1639 | 1780 | - | +25% |
| 2.7 Increase the number of students who transfer to in-state private or out-of-state four-year post-secondary institutions of higher learning. | 339 | 353 | 366 | 326 | - | +10% |
| 2.8 Increase the number of students who transfer to the California State University (CSU) system. | 911 | 826 | 753 | 999 | - | +10% |
| 2.9 Increase the number of students who transfer to the University of California (UC) system. | 269 | 240 | 292 | 280 | - | +10% |

| <u>Metric – Goal 3</u> | <u>2010-11</u> | <u>2011-12</u> | <u>2012-13</u> | <u>2013-14</u> | <u>Baseline 2014-15</u> | <u>Target 2019-20</u> |
|---|----------------|----------------|----------------|----------------|-----------------------------|---------------------------|
| 3.1 Number of students completing an associate degree that includes at least one online course. | - | - | - | - | - | +20% |
| 3.2 Number of students completing a certificate that includes at least one online course. | - | - | - | - | - | +20% |
| 3.3 Number of associate degrees completed 100% online. | 0 | 0 | 0 | 0 | 0 | 10 |
| 3.4 Number of certificates completed 100% online. | 0 | 0 | 0 | 0 | 0 | 10 |

| <u>Metric – Goal 4</u> | <u>2010-11</u> | <u>2011-12</u> | <u>2012-13</u> | <u>2013-14</u> | <u>Baseline 2014-15</u> | <u>Target 2019-20</u> |

| 4.1.5 Facilities Rentals | \$267,010 | \$301,733 | \$611,712 | \$982,871 | NA | |
| 4.1.6 Athletic Club(s) | \$2,003,731 | \$2,774,126 | \$3,545,269 | \$4,104,263 | NA | |

DEMOGRAPHIC TRENDS

SAN MATEO COUNTY

San Mateo County is an urban, educated, and financially affluent county. The estimated population in 2013 was 747,373. Whites (41.1%) were the major demographic group. Hispanics and Asians were next with 25.4% and 26.9% respectively. African-Americans comprised 3% of the County's total population.¹

Median household income in the County is \$87,751, well above the \$61,400 state average. Educational attainment and related household income, however, is far below the county and state average for Hispanic and African-American residents.²

The population of the County 65 and over is expected to increase dramatically in the coming decades.³

Since 2010, San Mateo County has grown approximately 1% annually. Offshore migration is increasing while domestic migration is slowing. In 2013, the County had 2,229 new residents owing to migration. Births accounted for 9,235 new residents.⁴

The proportion of all persons living in poverty in San Mateo County (7.6%) is half the California (11.5%) and United States (10.9%) proportions. However, four locations within the County exceed the County's average: East Palo Alto (18.4%), Redwood City (9.0%), Daly City (8.6%), and Colma (8.0%).⁵

The County is also linguistically complex. Fifty seven percent of youth (aged 5 to 17) speak English only versus the United States proportion of English only speakers (78%). One in four of the County's youth speak Spanish while one in ten speaks Asian or Pacific Island languages.⁶

Cities within the County that exceed the County's overall proportion of youth speaking Spanish include East Palo Alto (63%), Half Moon Bay (49%), Redwood City (48%), San Bruno (27%), San Mateo (26%), and South San Francisco (31%).⁷

Cities within the County that exceed the County's overall proportion of youth speaking Asian or Pacific Island languages include Daly City (27%), Foster City (26%), Millbrae (27%), and South San Francisco (14%).⁸

Bachelor’s and Master’s degree attainment for San Mateo County’s adults aged 25 older exceeds both the California and United States proportions by wide margins [Table 1 below].⁹

| Level | United States | California | San Mateo County |
|---|---------------|------------|------------------|
| Less Than High School Diploma | 13.6 | 18.5 | 11.2 |
| High School Graduate or GED | 28.0 | 20.6 | 16.9 |
| Some College or Associate Degree | 29.2 | 30.0 | 28.1 |
| Bachelor's Degree | 18.2 | 19.6 | 26.2 |
| Graduate or Professional Degree | 10.9 | 11.3 | 17.5 |
| Data are for the year 2012. Source: US Census American FactFinder (n.d.). Retrieved at factfinder2.census.gov | | | |

Those places within the County with households with children aged 18 and under that exceed the County average for all households (33.6%) are important locations that the District should consider when planning for future full-time enrollment. East Palo Alto (51.0%), Hillsborough (42.9%), Colma (37.0%), South San Francisco (36.8%), Woodside (36.7%), Redwood City (36.6%), Daly City (35.2%), Foster City (35.1%), Atherton (34.9%), and San Carlos (33.5%).⁹

BAY AREA AND THE PENINSULA

By 2040, the San Francisco Bay Area is projected to add 2.1 million people, going from 7.2 million to 9.3 million, an increase of 30%.¹⁰

The Bay Area is one of the most congested areas in the United States, costing commuters an average of \$1,109 annually.¹¹

At the same time, Caltrain ridership from San Francisco to the Silicon Valley has doubled since 2004, with more than 47,000 passengers on average each weekday.¹²

People who are 65 and over now represent 12 percent of the Bay Area's total population, but by 2040, their proportion will increase to 22 percent. The result is that more than one in five people in the Bay Area will be members of the 65+ group by 2040.¹³

By 2040 the Bay Area will become substantially more racially and ethnically diverse. Hispanics will emerge as the largest ethnic group, increasing from 23 to 35% of the population. The number of Asians will also increase, growing from 21 to 24% of the population.¹⁴

CALIFORNIA

Over the past year, the natural increase (births minus deaths) in California was 266,000 individuals. Natural increase remains the primary source of California's growth. In comparison, net migration increased the state's population by 66,000 residents. Net migration includes all legal and unauthorized foreign immigrants, residents who left the state to live abroad, and the balance of hundreds of thousands of people moving within the United States both to and from California. During the fiscal year just past, the state gained about 169,000 net foreign immigrants.¹⁵

Although California continues to add population faster than the average of other states (2.1% v 1.7%), immigration into the state has slowed.¹⁶

The state's immigrant population increased by only 15% (1.3 million) in the 2000's compared to 37% (2.4 million) in the 1990's. The recent decline in international immigration has been a contributing factor in the slowdown of California's overall population growth.¹⁷

Asia has now surpassed Latin America as the leading source of immigrants to California. This trend will continue for the foreseeable future.¹⁸

California's Hispanic population now equals the non-Hispanic white population. By early 2014, the California Department of Finance expects that California's Hispanic population will have become a plurality for the first time in state history.¹⁹

The proportion of adults who have attained at least a bachelor's degree (30.2%) in California is higher than the national proportion (28.2%). At the other end of the spectrum, the proportion of California adults who have earned a high school degree or higher (80.8%) lags the national proportion (85.4%), suggesting that the state imports a significant number of educated adults while native-born Californians have a lower rate of education attainment.²⁰

High rates of educational attainment are correlated with high levels of income. California's per capita income (\$29,634) leads the U.S. statistic (\$27,915).²¹

California's high per capita income, however, masks the fact that one in three working families in the state are considered low-income. Sixty percent of these families lack postsecondary education.²²

More than 3.2 million children, or 40 percent of all children under the age of 18 in California, are in working low-income families.²³

Compared to the national proportion (20.3%), California households (43.2%) are twice as likely to speak a language other than English.²⁴

Fifty percent of California's population aged 18 and under is Latino.²⁵

The majority of California's Latino population is native-born, especially among those under 18 years of age, while 37 percent of Latinos are foreign-born.²⁶

Recent research finds that 83 percent of Latino parents in California hope their children earn at least a bachelor's degree and 92 percent of Latinos believe that a college education is "very important."²⁷

More Blacks live in California than the combined total in Alabama, Louisiana, and Mississippi.²⁸

UNITED STATES

It is estimated that by 2025, the number of Americans over 60 will increase by 70%. Over the next decade, the challenge of providing for an aging population will come to the forefront. Aging individuals will increasingly demand opportunities, products, and medical services to accommodate more healthy and active senior years.²⁹

The demographics of the United States are growing increasingly complex. Nineteen percent of the total U.S. population consists of racial minorities while 20% of these report Hispanic ethnicity. A five percent increase in residents born outside the US between 2010 and 2012 culminates in 13% of the total population. Of these, a majority (53%) was born Latin America while more than one quarter (28%) were born in Asia.³⁰

Youth and young adults from immigrant families today represent 25% of the United States' population between the ages of 16 and 26—up from 20% just 15 years ago.³¹

Of the 47.6 million people who classified themselves as being of Hispanic or Latino origin on the 2010 census, 30.5 percent also considered themselves "some other race." Many emphasized their Hispanic heritage by writing in "Mexican," "Hispanic," "Latin American" or "Puerto Rican" to specify what they meant.³²

Implication of demographic trends. Population growth has slowed amid the County's relative affluence and educational attainment. Slow growth means that the District and its Colleges will need to increase take rates and continuously revise and renew program options to maintain current

enrollment levels. High-income households may not view community college education as a first choice. At the same time, there are persistent pockets of poverty within San Mateo County. The number of youth who speak languages other than English will increase. Programs and partnerships focused on the success of low-income students and students of color will be of critical importance. Similarly, the increasing proportion of older citizens and their preferences for learning will be a challenge. These trends require evaluation of the District's current array of programs, classes, and scheduling options as well as student support programs. Matching educational offerings to new needs based on an understanding of where gaps exist is critical to the District's future.

WORKFORCE TRENDS

SAN MATEO COUNTY

The most recent, published unemployment rate (March 2015) for the County was 3.4%, second lowest among California counties.³³ There are, however, pockets of unemployment that drag the average employment rate for the County downward. These cities and locations exceeded the County rate: Broadmoor CDP (5.6%), East Palo Alto (5.4%), North Fair Oaks CDP (5.1%), Brisbane (4.4%), Daly City (4.2%) and South San Francisco (3.6%).³⁴

Business building and leasing activity is accelerating in San Mateo County because the County is a desirable location for tech companies to expand.³⁵

Examples of recent economic expansion include: (a) BayCenter office campus along the Highway 92 corridor in San Mateo was recently sold for \$128.5 million; (b) Storm's Crossing 900 is on track to be completed by 2015. The 300,425-square-foot high-rise office development is located in Downtown Redwood City and already is 100% leased to Box, a young high tech company;³⁶ and (c) Alibaba, the Chinese internet commerce giant is increasing its leased space in San Mateo.

The top ten jobs with the largest number of openings are dominated by the service industry but also include jobs emphasizing quantitative and computer-related skills: Food Preparation and Serving Related Occupations; Computer and Mathematical Occupations; Business and Financial Operations Occupations; Computer Specialists; Sales and Related Occupations; Office and Administrative Support Occupations; Business Operations Specialists; Management Occupations; Personal Care and Service Occupations; and Food and Beverage Serving Workers.³⁷

The ten bottom jobs forecast to decline in number the most are principally associated with old technologies and include: Prepress Technicians and Workers; Claims Adjusters, Examiners, and Investigators; Postal Service Clerks; Travel Agents; Switchboard Operators, Including Answering Service; Printing Workers; Communications Equipment Operators; Farmers, Ranchers, and Other

Agricultural Managers; Postal Service Mail Carriers; and Postal Service Mail Sorters, Processors, and Processing.³⁸

There is more job churn in San Mateo County's labor market than any other county in the Bay Area. In an average year, 9.0% of all jobs will disappear. At the same time, jobs amounting to 10.1% of existing employment will be created, resulting in a net gain.³⁹

A substantial number of San Mateo County residents work in San Francisco and Santa Clara Counties while a substantial number of workers in San Mateo County live outside the County. Of the 348,055 resident workers in San Mateo County, 75,045 worked in San Francisco County and 50,125 worked in Santa Clara County. Of the 347,120 jobs in San Mateo County, 43,425 were filled by residents of San Francisco County, 41,520 from Santa Clara County and 50,900 from other Bay Area counties. Given this mobility for work and its location on the Peninsula, San Mateo County is situated squarely in the middle of a regional and not a local labor market.⁴⁰

BAY AREA AND THE PENINSULA

The Bay Area is home to 2.4% of the nation's total jobs. The Bay Area has 10.3% of all software jobs in the U.S., 8.3% of the Internet services jobs, 12% of computer and electronic manufacturing jobs, 7% of computer services jobs, and 8.1% of jobs in scientific R&D services. The Bay Area also has above average shares in management, consulting and architectural and engineering services.⁴¹

An entrepreneurial spirit pervades the Bay Area. In 2010, Bay Area organizations held 16,364 patents; 2nd place was New York with 6,383. Additionally the Bay Area has the highest proportion of college graduates in the workforce (44% v. 28%) and the highest share of jobs in the innovation sectors. The Bay Area has half the number of clean tech firms in the U.S., and 70% of the top social media firms.⁴²

Between 2007 and 2040, the Bay Area Council of Regional Governments projects above average job growth in these areas: Educational and Health Services (70%); Professional and Business Services (57%); Leisure and Hospitality (39%); Self-Employed (31%); and Information (30%). Below average growth is predicted for Manufacturing (-16%), Transportation, Warehousing, and Utilities (-17%); Government (-9%); Construction (-9%); and Financial Activities (-9%).⁴³

The Bay Area is the world's largest center for venture capital-backed high tech industry in the United States and the world. The region — which includes Silicon Valley, San Francisco, the Peninsula, Oakland and surrounding areas — attracted \$13.5 billion in venture capital investment in 2011, more than four times that of greater Boston or greater New York.⁴⁴

A growing number of Bay Area baby boomers will retire by 2030. These retirements will produce a large number of replacement job openings across a wide range of occupations and skill categories.

These job openings will need to be filled by growth in the workforce, particularly by workers aged 25–34, by existing workers and by new immigrants.⁴⁵

In April 2014, job levels in the Peninsula metro areas were 8.3 percent above the pre-recession peak while the Peninsula unemployment rate was down to 4.8 percent. The gains were led by a surge in technology jobs from San Francisco to San Jose.⁴⁶

The Peninsula’s economic base is led by the surge in technology. The Information and Professional & Business Services sectors are where most of this job growth is occurring. Health Care and the Leisure & Hospitality sector (led by restaurant and hotel growth) are the other growth leaders. These sectors were barely touched by the recession and have grown steadily during the recovery.⁴⁷

As of October 2013, the most recent job ads for Marin, San Francisco and San Mateo Counties are Software Developers, Marketing Managers, Web Developers, Retail Sales Persons, Network and Computer Systems, Information Technology Project Managers, Computer Systems Analysts, Registered Nurses, Accountants, and Medical Scientists, Except Epidemiologists.⁴⁸

Against this rosy picture, an alternate view is emerging. Namely, the Peninsula economy is no longer generating as many mid-range jobs as it formerly did and low-wage jobs are proliferating, creating an “hour glass” labor market. The forecast is for the Peninsula to have more jobs that have a median wage under \$20 per hour and more jobs above \$35 per hour, and either segment will outnumber middle wage jobs paying between \$20 and \$35 per hour.⁴⁹

Emerging practices in workforce development can help the County meet future needs, especially for immigrants. A recent report recommends that industries should host on-site English and related job readiness programs, participate in linked learning programs to inform and excite high school students, and develop industry-driven training partnerships. The same report recommends that workforce boards and training partners should collaborate to develop regional training programs that avoid duplication, help customers learn about online job searching, and form alumni groups to mentor and network current program participants.⁵⁰

A strong practice in workforce development is contextualization in which low-skilled adults simultaneously learn job skills and basic skills. A new collaboration between the San Mateo and Santa Clara County Workforce Boards known as the Alliance for Language Learners’ Education and Success (ALLIES) seeks to build the workforce competencies of adult immigrants. Skyline College and four area hotels are participants.⁵¹

San Mateo County’s average weekly wage (\$3,240) was in the top four for counties nationally in the fourth quarter of 2012. The US average was \$1,000.⁵²

CALIFORNIA

California is on track to face a shortage of 2.3 million college graduates needed to meet the state's workforce demands in 2025.⁵³

The top five *fastest growing* employment industries in California through the year 2020 include: mining, quarrying, and oil and gas extraction (38%, 63,730 total jobs); education services (32%, 479,560 total jobs); professional, scientific, and technical services (27%, 1,785,860 total jobs); healthcare and social assistance (27%, 1,950,160 total jobs); and administrative and support and waste management and remediation services (25%, 1,278,930 total jobs).⁵⁴

The bottom five *slowest growing* employment industries through the year 2020 include: management of companies and enterprises (-1%, 171,650 total jobs); manufacturing (3%, 1,113,830 total jobs); agriculture, forestry, fishing, and hunting (4%, 385,350 total jobs); information (11%, 461,730 total jobs); and government (11%, 2,205,160 total jobs).⁵⁵

States now appear to be increasing their budgetary commitment to higher education. However, it should be remembered that the percentage increases are based upon smaller bases and thus may look greater than the actual amounts would imply. The approximate year-to-year change for public universities in California was 5 percent. It is anticipated that this will allow the UC and CSU systems to keep tuition and fees for 2015 at the 2014 levels.⁵⁶

The Golden State sets the gold standard for innovation and access to capital, and its economy is turning around. However, "golden" could also describe the state's costs of living and doing business. California ranks 1st in access to capital and in technology and innovation but 48th overall in the cost of doing business according to a recent study. Lower rankings for the cost of living, business friendliness, and education and availability of its workforce offset the state's top rankings. The District can impact this trend by accelerating efforts to educate students in technology and other workforce-related programs.⁵⁷

A study by the University of California, Davis' Center for Watershed Sciences finds that this year's drought and the resulting water shortage will cost the state about \$1.5 billion in direct agricultural costs, including \$810 million in crop revenue and over \$200 million in dairy and livestock. Total drought-related costs to the California economy for the year are projected at \$2.2 billion, with a loss of 17,100 seasonal and part-time jobs.⁵⁸

UNITED STATES

In 1970, seven in 10 workers with high-school diploma were in the middle class. Today fewer than 4 in 10 with only high school degrees as their highest level of education attainment remain there.⁵⁹

Associate degree attainment is increasingly important. The median earnings of associate degree holders during their careers are about \$259,000 more than for high school graduates.⁶⁰ Attending or

graduating from a community college doubles an individual's chance of finding a job compared to those who failed to complete high school.⁶¹ The U.S. Bureau of Labor Statistics projects that occupations that require an associate degree will grow by 18 percent through 2020 – faster than the new job growth for those with a bachelor's degree.⁶²

The percentage of jobs that require college degrees has doubled in the past 40 years and will continue to increase. By 2018, 637,000 more low-skill jobs will disappear or go offshore. At the same time, millions of Americans could miss out on entering the middle class if they do not obtain a degree, because the workforce will require 22 million degree-equipped employees for new high-skill jobs created by 2018.⁶³

The United States is losing ground in the critical area of college completion. We now rank 14th among 37 OECD and G20 countries in the percentage of 25 to 34 year-olds with higher education at 42%, far behind the leader, Korea (65%).⁶⁴

The US has a higher youth unemployment rate (26.6%) than France, Britain, Japan, Germany, and Canada. This rate is vastly higher than it was in 2000, when the U.S. had lower youth unemployment than all of those countries. Unemployment rates are higher among youth with high school degrees than those with college degrees.⁶⁵

Implications of Workforce Trends. There is a commercial real estate boom underway in the County owing in part to its location in the middle of the Silicon Valley. Propelled by technology and innovation, Silicon Valley and the Peninsula create both opportunity and challenges for the District, especially in matching employer needs for qualified workers and in preparing students to advance in the workforce. The number of “middle jobs” appears to be declining, placing a premium on those individuals with skills and leaving behind those without. Even with an unemployment rate well below the state average, pockets of unemployment persist in the County. Amid these changes, continued collaboration with business and industry to provide needed training and skills upgrades for current employees will be increasingly important.

HOUSING TRENDS

BAY AREA, THE PENINSULA, AND SAN MATEO COUNTY

As the region ages, retirements will follow as well as an increased potential demand for smaller housing units and increased demand for housing in high-amenity neighborhoods.

San Mateo County's homeownership rate (59.7%) exceeds California's (56.0%). The median value of owner-occupied housing in the County was nearly double the overall California statistic.⁶⁶ Both statistics suggest a stable but expensive home market, especially for first-time homebuyers and young families.

More than 70 percent of recent residential building has been in multi-family structures, for both sale and rental, a share that could increase in the coming years.⁶⁷

Approximately 40% of the housing units in San Mateo County are rentals and it appears that the rental share of the overall housing market is growing.⁶⁸ In 2012, median monthly rent was \$1,541 and that median rent is much higher in 2015. Higher rents usually translate into fewer dollars available for education. Rents are relative, however, and a more useful statistic for community college planning is the proportion of household income paid to rent. Portola Valley (40.5), East Palo Alto (39.6%), Brisbane (36.8%), Daly City (33.3%), Redwood City (31.8%), and South San Francisco (31.0%) exceed the County's overall statistic for proportion of household income paid to rent (30.3%).⁶⁹

Implications of Housing Trends. Homeownership costs are high meaning that young families may be unable to relocate to San Mateo County without sufficiently high levels of income typically brought about by accompanying high levels of education. As the population ages in the County and as available land increases in cost, an increasing proportion of new construction will be in multi-unit structures. As the housing market, especially in places where rental costs are high, squeezes lower-income families, disposable income for education and tuition may decline, making it more difficult for the District to increase its penetration rate for this key demographic.

COMMUNITY COLLEGE TRENDS

BAY AREA, THE PENINSULA, AND SAN MATEO COUNTY

In addition to the three Colleges that comprise the San Mateo Community College District, there are 10 other public community colleges operating within a 25-mile radius of the City of San Mateo.⁷⁰

There are three public higher education institutions offering bachelor's degrees in a 25-mile radius of the City of San Mateo. San Mateo County, however, lacks a full-service 4-year public higher education institution.⁷¹

CALIFORNIA

California's public higher education sectors grew in enrollment by 14.4% from 1990 through 2011. Among these sectors, the community colleges grew the least (9.8%) while the California State University System grew by 44.7% and the University of California System grew by 24.8%.⁷²

California is home to nearly 25 percent of the nation's community college students, but approximately, only half of those seeking a degree, certificate, or transfer meet their goal within six years. Hispanic and Black students in California fare even worse.⁷³

Approximately two-thirds of young (aged 25-34) Asians/Pacific Islanders have achieved a postsecondary degree in California, compared with 52% for White non-Hispanics, 29% for Black non-Hispanics, 27% for American Indians/Alaska Natives, and 17% for Hispanics.⁷⁴

In 2012, Latinos outnumbered all others in applications to the University of California schools for the first time.⁷⁵

By 2016, California community college students for the first time will need to maintain certain academic performance standards to remain eligible for fee waivers. The result may alter student attendance patterns significantly for community colleges.⁷⁶

In April 2013, the California Community Colleges joined other states to release a "Student Success Scorecard." Mandated by AB1456, it provides transfer and degree or certificate completion and persistence rates as well as data on how effectively colleges move students through remedial and career-technical courses on each of the system's 112 campuses. Each measure is reported by "college-prepared" and "unprepared for college," and broken down by race, ethnicity, gender, and age and includes transfer rates and "momentum points," such as the percentage of students who complete 30 units.⁷⁷

California's new streamlined transfer program developed by California Community Colleges and California State University now offers 1,000 associate degrees for transfer. In the 2012-2013 academic year, the first full year that these transfer degrees were available, 1,730 associate of science for transfer and 3,571 associate of arts for transfer degrees were awarded to California community colleges students.⁷⁸

In the most recent California Legislative session, SB 440 was passed which expands the Student Transfer Achievement Reform Act of 2010 to require that, prior to the 2014-15 academic year, every California Community College create an associate degree for transfer in every major that has a transfer model curriculum. Students completing associate degrees for transfer receive priority registration in the California State University system.⁷⁹

Seventy-seven percent of all students enrolled in California community colleges are categorized as "below college level." Six-year completion rates for these students are consistently in the range of 42 to 43%, contrasted to the 72% rates for students who are designated as college level.⁸⁰

In August 2014, the California Legislature passed a bill allowing up to 15 community college districts to establish a statewide baccalaureate degree pilot program in consultation with the California State University and the University of California. Districts would be permitted to offer one baccalaureate degree program each, to be determined by the chancellor and approved by the board of governors. The SMCCCD was one of 12 colleges to be selected for this pilot program. This brings the total to 23 states that now authorize baccalaureate degrees at their community colleges.⁸¹

California Community Colleges recently released a scorecard documenting completion rates for students by race/ethnicity. The scorecard shows that completion rates have declined over the past six years for Latinos, African Americans, Asians, and Whites. Further, there is a large and persistent gap between “prepared” and “underprepared” students.⁸²

Experience demonstrates that narrowing programmatic and academic options for low-income students while providing them with more structure can dramatically improve their completion rates. The City University of New York, for example, found that a third of structured program participants had graduated over two and a half years compared to less than a fifth of other students.⁸³

UNITED STATES

After increasing throughout the Great Recession, overall postsecondary enrollments decreased 1.5% from the previous Fall. In Fall 2013, enrollments decreased among four-year for-profit institutions (-9.7%) and two-year public institutions (-3.1%). However, enrollments increased slightly among four-year public institutions (+0.3%) and four-year private non-profit institutions (+1.3%). The public two-year college decrease was the third consecutive decline and reflects, in part, a recovering national economy.⁸⁴

College enrollment overall is becoming more racially diverse. The national percentage of Hispanic college students rose from 11% to 17% between 2006 and 2012. The number of Black students rose slightly, from 14% to 15%, while the number of non-Hispanic White students went down, from 67% to 58%.⁸⁵

Postsecondary enrollment of adults aged 25 and older is projected to grow by 25.4% between Fall 2008 and Fall 2019.⁸⁶

The numbers of low-income students are changing, as well. Half of low-income high school graduates were college students in 2012, up from one-third in the 1980's. The current gap between high-income and low-income students entering college is 31%.⁸⁷

The United States ranks 27th among developed nations in the proportion of college students earning undergraduate degrees in science or engineering.⁸⁸

Declining state funding has forced students to shoulder a bigger proportion of college costs; tuition in the United States has almost doubled as a share of public college revenues over the past 25 years from 25 percent to 47 percent.⁸⁹

President Obama unveiled a plan in August 2013 to measure college performance through a new ratings system so students and families have the information to select schools that provide the best value. After this ratings system is well established, Congress would presumably have the information

to tie federal student aid to college performance so that students maximize their federal aid at institutions providing the best value.⁹⁰

Changes in federal financial aid eligibility made effective in 2012 impact all community colleges' efforts to recruit and retain students. These changes mandate that students must have earned either a high school diploma or a recognized equivalent [such as a General Educational Development certificate [GED] or a homeschool education] prior to admission, meaning students will longer be able to simply take a test, often known as an "ability to benefit test," to be admitted.⁹¹

Another large federal policy change made in 2012 is the limit in the length of time students can receive Pell Grants; students are now capped at 12 semesters or the equivalent. Those who exceed this limit are denied eligibility for future Pell Grants.⁹²

As the United States continues to push education in STEM (Science, Technology, Engineering and Mathematics) areas, it is interesting to note that most students who receive bachelor's in these areas do not always end up in jobs or careers in these areas.⁹³

Over the past six years, the percentage of community colleges student loan borrowers who have defaulted has risen from 13 to nearly 21 percent. Under the new national standard, colleges will be accountable for their three-year default rates and penalties will take effect if a college's cohort default rate exceeds 30 percent for three years in a row, or 40 percent for a single year.⁹⁴

Implications of Community College Trends. Enrollment growth in community colleges nationwide has stabilized or declined as the national economy improves. Competition for students will increase as a result. Besides the three Colleges within the District, there are ten community colleges operating in the area. Understanding their array of programs will be a strategic factor as the District explores strengthening existing programs and creating new programs based on market needs and demographics. The increasing proportion of students entering college with skills deficits will require new responses including mandatory scheduling and advising to increase student success and retention.

HIGHER EDUCATION POLICY

CALIFORNIA

Two years ago, the California Community College Board of Governors established the Student Success Task Force. The Task Force was to examine best practices and provide recommendations for improving student educational outcomes and workforce preparedness. The Task Force made 22 recommendations that were signed into legislation known as the Student Success Act of 2012, Senate Bill 1456. The key provisions are mandated assessment, orientation, and education planning tied to a new performance-based funding model, the Student Success Services and Programs (SSSP), replacing the categorical funding model in Fall 2014.⁹⁵

UNITED STATES

Performance-based funding, in effect paying colleges for students that graduate or meet other criteria and not simply for enrollment, has evolved into a national movement in public higher education. Thirty-nine states are currently active in performance based funding. Twenty-two states have performance based funding in place. Seven are in transition while 10 states are actively discussing it.⁹⁶

Implications of State Education Policy Trends. It is likely that the California Legislature will continue to develop new policies that will impact the District and its operations. Especially prominent will be policies intended to increase student transfer and completion. Accreditation is the most recent area targeted for legislative intervention.

K THROUGH 12 TRENDS

SAN MATEO COUNTY

The County's K-12 enrollment is projected to grow by 3% over the District's current planning period (from 2014-15 through 2019-20). Most of that growth (7%) is forecast for the secondary level; the K-6 cohort will grow by just one percent, signaling a coming decline in the college recruitment pool. The number of high school graduates, however, is predicted to grow during the planning period by 4% through the year 2020, adding 256 additional graduates and increasing in number to 5,836.⁹⁷

Hispanics are the largest single K-12 ethnic group in San Mateo public schools. At the same time, their enrollment is proportionately less than in California overall. When compared to California, San Mateo K-12 enrollment is less likely to be Hispanic or Latino (38% v. 53% statewide) and African American (2% v. 6% statewide). In contrast, San Mateo's K-12 enrollment is more likely to be Asian (13% v. 9% statewide), Filipino (8% v. 2% statewide), and White (29% v. 25% statewide).⁹⁸

At the secondary level, Hispanic or Latino students account for 37% of secondary enrollments in the County followed by Whites (29%), Asians (12%), Filipinos (8%), African Americans (3%), and Pacific Islanders (2%).

Secondary school dropout rates in the County vary significantly by race and ethnicity. During the 2012-13 year, for example, the overall dropout rate for 12th graders was 3.9%. American Indians (15.8%), Pacific Islanders (7.3%), Hispanic or Latinos (5.8%), and African Americans (7.0%) significantly exceeded the overall rate.⁹⁹

Thirty-two percent of the County's 11th graders are estimated to be college ready in English while 20.8% are college ready in math. Thirty-four percent of 5th graders are on track to be college ready in English and math.¹⁰⁰

More than a third (34.2%) of the County's K-12 enrollment qualifies for free or reduced fee lunches.¹⁰¹

CALIFORNIA

California's production of high school graduates peaked in 2010-11 at more than 430,000, marking the end of an era of explosive growth from 1989-90 that added more than 196,000 graduates (84%). Between 2010-11 and 2013-14, production will fall by over 37,000 (a 9% decline), after which it will continue to decline, though inconsistently and at a more modest pace, through 2020-21.¹⁰²

California's implementation of the new Common Core State Standards and Smarter Balance standardized assessments creates a necessity for open access colleges and universities to specify academic preparation needed for college to align curricula with high schools to improve both access and completion.¹⁰³

Wide gaps persist in test results across racial and ethnic, gender, and income groups in California. On the most recent National Assessment of Education Progress, African American students had an average score 28 points lower than White students, a performance gap not significantly different from that in 1998 (30 Points). Hispanic students had an average score 23 points lower, narrower than that in 1998. In 2013, female students averaged 10 points higher than males while students eligible for free or reduced priced school lunch averaged 25 points lower than those who did not.¹⁰⁴

UNITED STATES

The United States ranks 20th in high school completion rate among industrialized nations and 16th in college completion rate.¹⁰⁵

At the national level, only 68% of ninth graders graduate from high school in four years, and only 18% go on to complete an associate degree within three years after entry into a community college or a bachelor's degree within six years of enrolling in a 4-year college.¹⁰⁶

Implications of K through 12 Trends. K-6 enrollments throughout the County will not increase at the same rate as secondary enrollments, signaling a declining recruitment pool for the District. The dropout rate for students of color in secondary schools is significantly higher than the rate for White students. Since high school, graduates entering the District's colleges enroll primarily on a full-time basis, changes in penetration rates will need to be closely monitored and new pathways built to provide enrollment stability. Pathways to the District's Colleges that are established in middle and secondary schools will be increasingly important.

NEW PARADIGMS

BAY AREA, THE PENINSULA, AND SAN MATEO COUNTY

The Bay Area is home to eLearning firms operating on the cutting edge and attempting to reshape education opportunities throughout the world. These including the Khan Academy, Animation Mentor, Udacity, The eLearning Guild, Emantras, and Coursera, all or one of which may be a potential partner.

A recent partnership between Udacity and San Jose State University to make Massively Open Online Courses (MOOC's) available at low cost may hold lessons for other higher education institutions. Limited Internet experience and technical glitches hampered many students, especially those in remedial classes, which had high failure rates. One major problem is matching student needs to complete work more quickly and others to take more time, especially since SJS is set up entirely on the semester system.¹⁰⁷

CALIFORNIA

California, at 6.4%, was among the bottom five states as measured by the number of students taking only on-line courses.¹⁰⁸

Of all courses offered at California's community colleges, 12.3% are offered through distance education, and it is estimated that nearly half of all courses have some online component.¹⁰⁹

Fifty-one percent of California's community colleges offer certificates and degrees that can be earned without stepping onto campus for classes. This typically includes a combination of both online and television courses.¹¹⁰

Thirty-seven percent of California community college students surveyed in 2011 said they enrolled in at least one distance education course because of the convenience.¹¹¹

UNITED STATES

The number of students who choose to take online courses for credit is on the rise and by 2013 totaled a record 7.1 million. In the past few years the rate has been slower, but online classes are still growing faster than higher institutions' enrollment overall.¹¹²

In 2011, it was estimated that about \$35.6 billion was spent on self-paced eLearning across the globe. Today, eLearning is a \$56.2 billion industry. It is predicted to double by 2015.¹¹³

Seventy-seven percent of academic leaders in the U.S. rate the learning outcomes in online education as the same or superior to those in face-to-face classes. However, the proportion of chief academic officers who believe their faculty accepts the value and legitimacy of online education has not

increased (30.2%) from last year's survey. Nonetheless, the proportion of chief academic leaders who say online learning is critical to their long-term strategy is at a new high (69.1%).¹¹⁴

Smartphones are increasingly a vehicle for Americans' to access the Internet. For example, 46% of Americans have a home broadband connection and a smartphone, 24% have a home broadband connection, but not a smartphone, and 10% have a smartphone, but not a home broadband connection. These routes to connectivity are more pronounced among young people; 95% report having access to the Internet either through smartphones or home broadband.¹¹⁵

Colleges, universities, and foundations have poured more than \$100million into creating open education resources (OER). However, higher education has been slow to use the resources as alternatives to expensive textbooks. Known as the "Textbook Zero" model, savings to students can be game changing while providing the same pathway to learning mastery as traditional textbooks.¹¹⁶

Competency-based learning approaches to delivering and managing curricula are gaining newfound acceptance in American higher education and have spread to the community college sector. For example, Western Governor's University is now working with a cohort of eleven community colleges to create their own competency-based degrees and certificates, mostly in information technology tracks.¹¹⁷

The University of Southern New Hampshire (SNHU) also uses competency-based curriculum to speed student completion of online associate degrees. Tuition and fees at SNHU's College for America are \$1,250 per six-month term. The college uses a subscription-style model in which students can complete assessments at their own speed. The associate degree is designed for students to complete in an average of two years -- at a cost of \$5,000.¹¹⁸ SNHU was the only university to make Fast Company's 2012 list of the World's 50 Most Innovative Companies, which included such companies as Apple, Google, HBO and LinkedIn.¹¹⁹

The "Flipped Classroom" has gained traction in higher education as an active learning model. It inverts the traditional method of providing instruction by hosting video lectures for students to watch before class at home and activities and discussion in the classroom. By reversing the typical lecture and homework elements, students become more engaged in course material.¹²⁰

When asked whether they think students should be able to receive college credit for knowledge and skills acquired outside the classroom, nearly 9 in 10 Americans [87%] said yes. This suggests that higher education institutions could initiate community collaborations/partnerships to help facilitate certificate or degree completion for some working Americans.¹²¹

Additionally, three-quarters of Americans (75%) indicate that they would be more likely to enroll in a higher education program if they could be evaluated and receive credit for what they already know.¹²²

A very recent survey of 343 U.S. executives familiar with their company’s workforce development strategy and higher education efforts indicates that 71% surveyed say that increased employee loyalty and higher retention rates is a top incentive for investing in post-secondary education and training programs for employees. This report also suggests that colleges think they are adequately preparing students for the workforce but that industry sharply disagrees.¹²³

An increasing number of colleges are making use of student data to improve classes, teaching methods, and entire programs. Sometimes called Big Data, businesses have been mining such data for years to predict trends and consumer behavior patterns, thereby providing a custom experience to consumers. “Learning analytics” will be effective as higher education moves to personalize the educational experience for learners at the individual level.¹²⁴

Mobile computing is now defined by smartphones and simple, low-cost software extensions known as “apps.” Simple but useful apps have found their way into almost every task imaginable and they continue to grow in popularity. In 2013, it is estimated that 102 billion apps were downloaded.

Implications of New Paradigms. Educational technology has evolved dramatically over the past decade, causing higher education institutions to rethink how and when to deliver courses and programs. Learners everywhere—especially in the Silicon Valley—are likely to have high expectations for the use of technology in courses and support services. Similarly, competency-based learning approaches can help develop accelerated pathways for certificate and degree attainment that are important to students and employers.

APPENDIX C: IMPERATIVES FOR PLANNING – OBSERVATIONS FROM THE DATA PREPARED FOR THE SMCCCD STRATEGIC PLAN

The environmental trends section developed for this strategic planning report paints a picture of external factors that drive planning in the District. Highlights are summarized here.

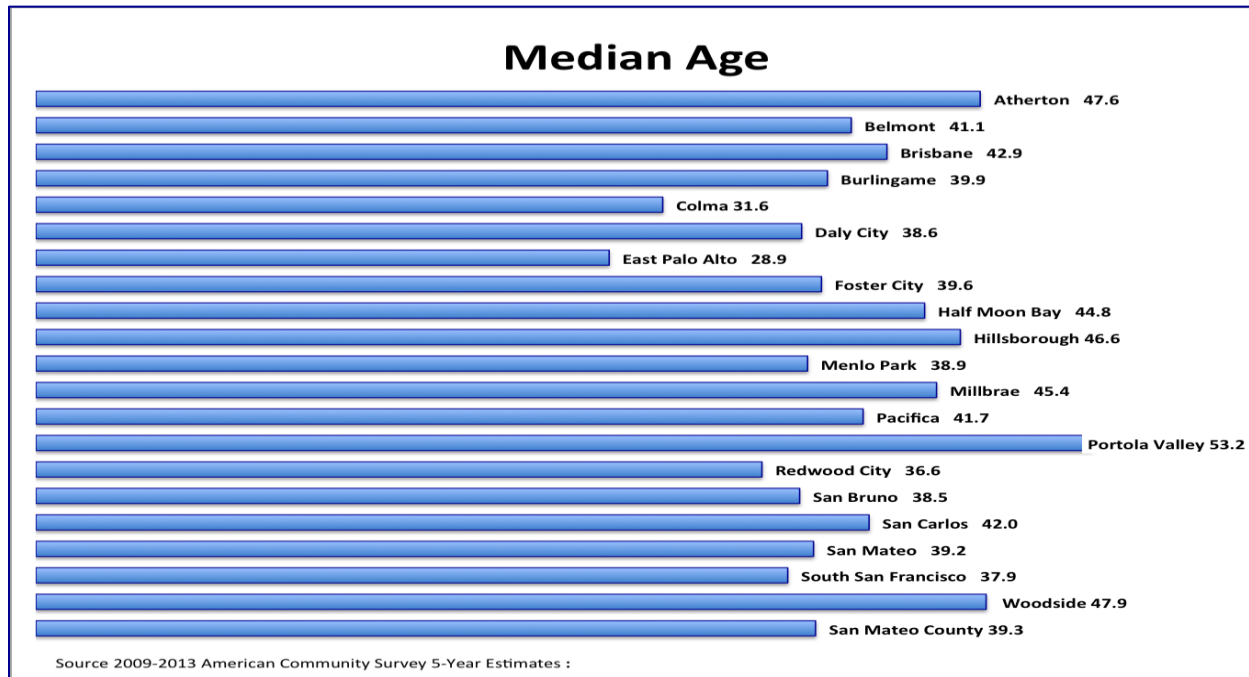

DEMOGRAPHICS

Situated between San Francisco to the north and San Jose to the south, San Mateo County is in the middle of the Silicon Valley. San Mateo County is, on average, educated and affluent amid pockets of low education attainment and poverty. Overall [demographic projections](#) call for a 9.4% growth in population in San Mateo County between 2015 and 2030. Almost all of this growth will take place after the planning period, however.

AGE AND FORECASTED SHIFTS

Median age in the County and its cities is found in Figure 1. San Mateo County’s median age is 39.3. Cities falling under that median are: East Palo Alto (28.9), Colma (31.6), Redwood City (36.6), South San Francisco (37.9), San Bruno (38.5), Daly City (38.6), Menlo Park (38.9), and San Mateo (39.2). The oldest cities in the County include Portola Valley (53.2), Woodside (47.9), and Atherton (47.6).

Figure 1

After the planning period, younger adults (age ranges 15 to 34) will increase sharply as will older adults (ages 60 and above). Beyond the planning period, San Mateo County and the surrounding counties are expected to experience above average growth in population for people ages 29 and younger, and declines in population for adults ages 30-54. The decline in younger adults during the planning period is a pivotal finding facing the District's immediate future (Figure 2).

RACE AND ETHNICITY

Shifting race and ethnicity patterns in San Mateo County also shape the District's strategic planning (Table 1). It is estimated that the overall White population will decline over the planning period while the proportion of San Mateo County's population that identifies themselves as Asian, Hispanic or Latino, American Indian, or Two or More Races will increase. These changes are more evident at the secondary school level where the proportion of Hispanic graduates now surpasses the White Not-Hispanic proportion (Figure 3).

Figure 2

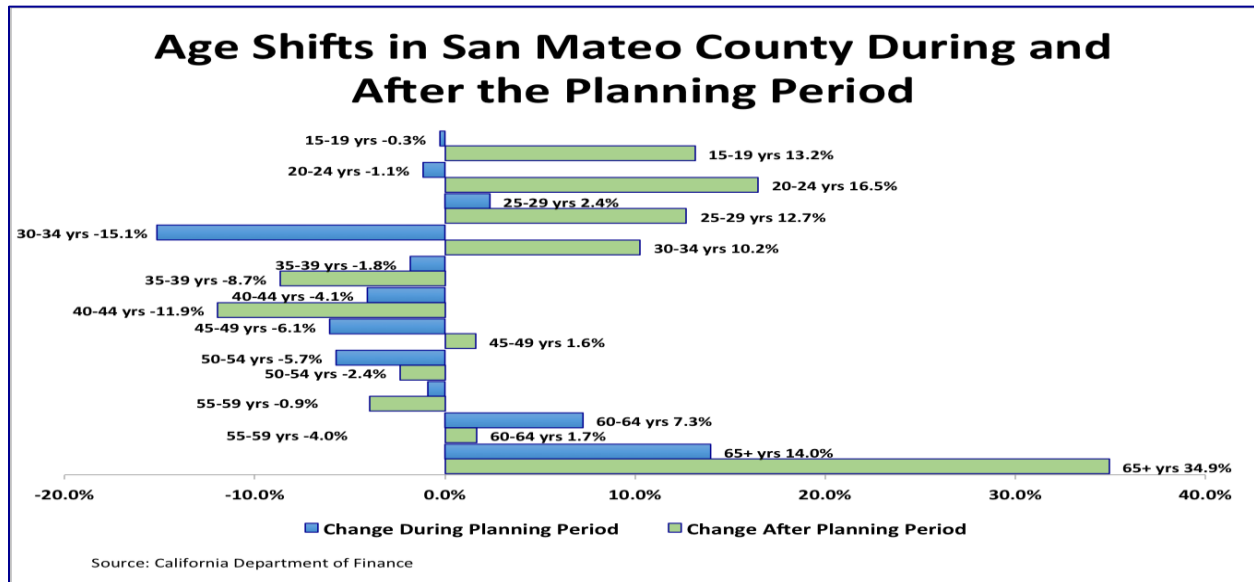

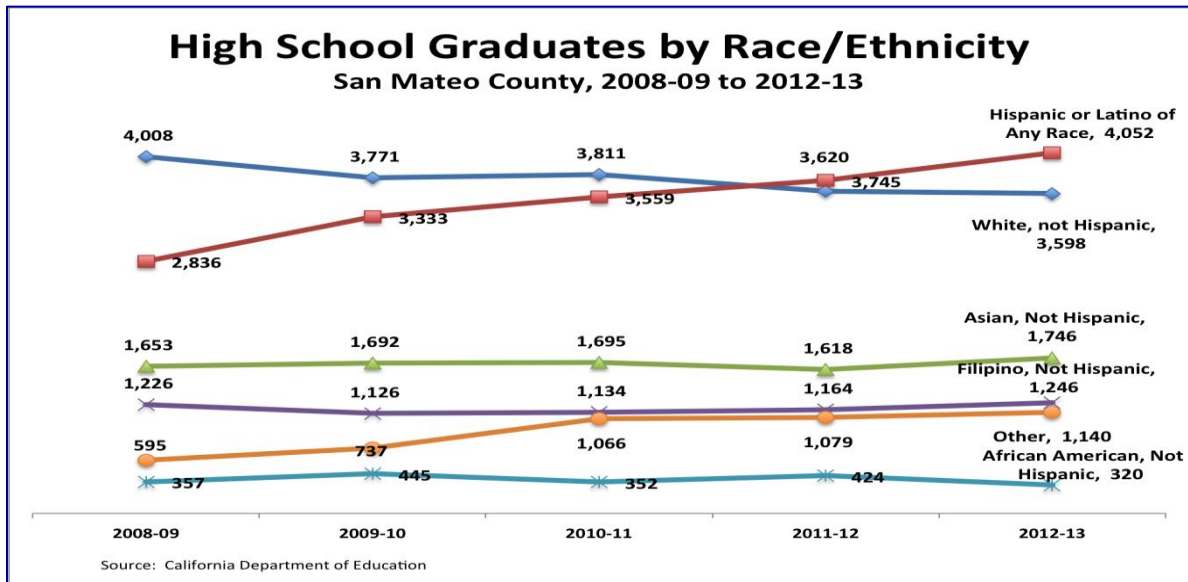

Table 1
Overall Shifts in Race and Ethnicity in San Mateo County

| | 2015 | 2020 | 2030 | % Change During the Planning Period |
|--|---------|---------|---------|-------------------------------------|
| American Indian and Alaska Native Alone, Not Hispanic or Latino | 1,202 | 1,251 | 1,286 | 4.1% |
| Asian Alone, Not Hispanic or Latino | 192,367 | 204,567 | 215,893 | 6.3% |
| Black or African American Alone, Not Hispanic or Latino | 19,038 | 18,877 | 18,689 | -0.8% |
| Hispanic or Latino of Any Race | 195,499 | 207,976 | 220,579 | 6.4% |
| Native Hawaiian and Other Pacific Islander Alone, Not Hispanic or Latino | 11,395 | 12,392 | 13,360 | 8.7% |
| Two or More | 25,725 | 28,328 | 31,404 | 10.1% |
| White, Not Hispanic or Latino | 307,525 | 303,697 | 299,717 | -1.2% |

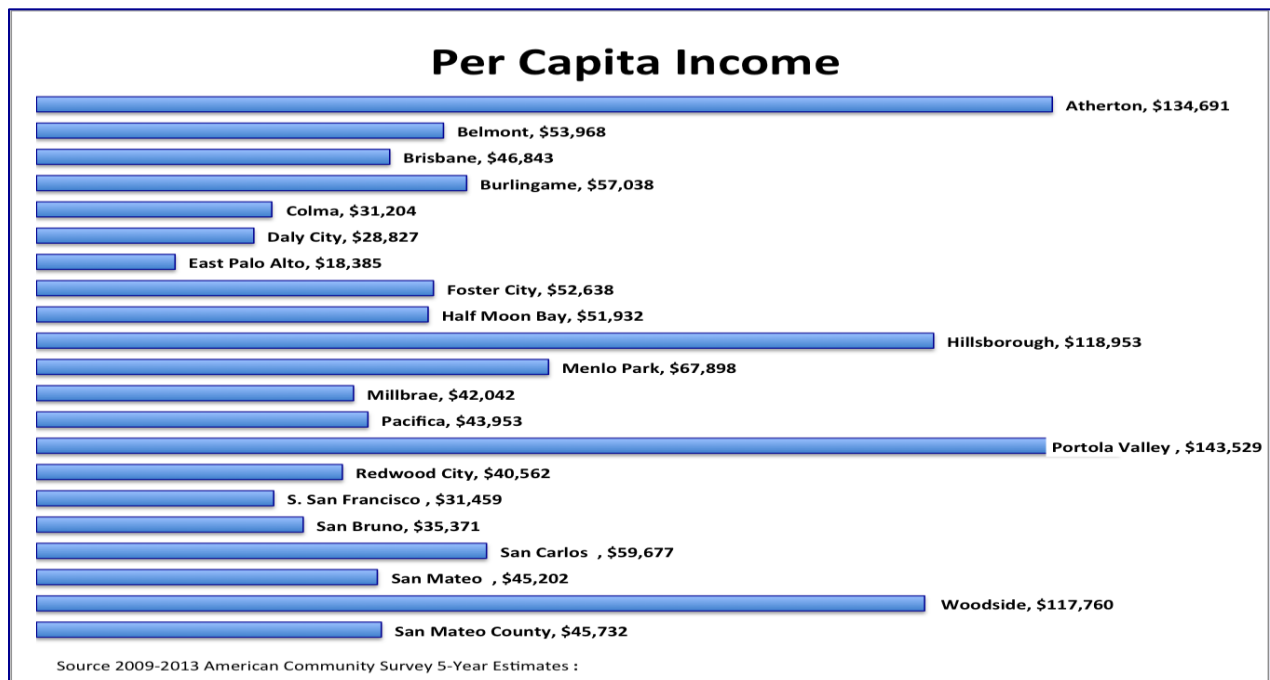

Figure 3

INCOME AND POVERTY

The County's median household income of \$87,751 is substantially higher than all but several counties in California. The proportion of all persons living in poverty in San Mateo County (7.6%) is half the California (15.9%) and United States (15.4%) proportions. However, four cities within the County exceed the San Mateo County average: East Palo Alto (18.4%), Redwood City (9.0%), Daly City (8.6%), and Colma (8.0%).¹ Figure 4 depicts Per Capita Income in San Mateo County and shows the wealth gap in the County.

ENGLISH LANGUAGE PROFICIENCY

San Mateo County is linguistically complex as illustrated by Table 2. The majority of residents of East Palo Alto speak Spanish at home. Other locations where more than a quarter of homes speak Spanish include Colma, Redwood City, Half Moon Bay, and South San Francisco. Locations where more than a quarter of homes speak Asian and Pacific Islander languages include Daly City, Foster City, and Millbrae.

| | English only | Spanish | Other Indo-European languages | Asian and Pacific Islander languages | Other languages |

EDUCATIONAL ATTAINMENT

Educational attainment among adults aged 25 in San Mateo County older exceeds both the California and United States proportions by wide margins (Table 3). The proportion of adults in the County holding Bachelor's degrees or higher is significantly greater than either California or the nation. Even with a high overall rate of educational attainment, there are cities and other locations in the

County where educational attainment are low (Table 4). Through this plan the District will work with school districts, community based organizations, businesses and industry, and other partners to help close these gaps.

| Attainment | % United States | % California | % San Mateo County |
|----------------------------------|-----------------|--------------|--------------------|
| Less Than High School Diploma | 13.6 | 18.5 | 11.2 |
| High School Graduate or GED | 28.0 | 20.6 | 16.9 |
| Some College or Associate Degree | 29.2 | 30.0 | 28.1 |
| Bachelor's Degree | 18.2 | 19.6 | 26.8 |
| Graduate or Professional Degree | 10.9 | 11.3 | 17.6 |

DEMOGRAPHIC SUMMARY

The demographic pattern in San Mateo County as portrayed above shows income, age, and languages spoken at home to be correlated. In general, cities where these factors are lower also have lower levels of education attainment. The reverse is also true. Since this Strategic Plan seeks to increase the education attainment level in the County, the communities with these characteristics are the places where accelerated effort should be directed.

EQUITY

The San Mateo Community College District has a longstanding commitment to closing equity gaps. This commitment has seen recent and accelerated interest statewide. In particular, the [Student Success Act of 2012](#) has been a focus for the State Assembly as well as the California Community Colleges. To meet its obligations to students and taxpayers, the District will continue to utilize its own research to identify where all students are succeeding or not succeeding in their educational pursuits. In particular, these disaggregated subgroups will be a focus of Districtwide efforts to close equity gaps: race/ethnicity, age, gender, veteran's status, economic disadvantage, and foster youth. Closing equity gaps depends on understanding the experiences of students entering one of the three Colleges as well as those prospective students who do not enter. Cohort analysis will continue to be used to determine both overall success rates for all students in the District and success rates for the subgroups identified above.

In November 2014 the San Mateo Community College Board of Trustees approved [Equity Plans](#) developed by each College to identify gaps in access, course completion, ESL and basic skills completion, degrees, certificates and transfer for all students as measured by success indicators linked to the [California Community Colleges Student Success Scorecard](#), as well as local measures developed at each College. College plans identify quantitative benchmarks and associated targets to close equity gaps. Prior to next academic year, 2015-16, the State Chancellor's Office will set system targets for overall improvement while individual community colleges will set their own targets. These targets will be updated annually.

ECONOMICS

EMPLOYMENT

Business building and leasing activity is accelerating in San Mateo County, and the County is a desirable location for [tech companies to expand](#). The acceleration of openings in the tech-based economy recently placed the County as the [second most favorable unemployment rate](#) among California's counties. There are, however, pockets of unemployment within the County that drag the average employment rate downward. As of March 2015, these cities and locations [exceeded the](#)

[County's 3.4% unemployment rate](#): Broadmoor CDP (5.6%), East Palo Alto (5.4%), North Fair Oaks CDP (5.1%), Brisbane (4.4%), Daly City (4.2%), and South San Francisco (3.6%).²

BUSINESS EXPANSION

Examples of recent economic expansion include: (a) San Mateo BayCenter Office Campus along the Highway 92 corridor in San Mateo was recently sold for \$128.5 million; (b) Storm's Crossing 900 is on track to be completed by 2015. The 300,425-square-foot high-rise office development is located in Downtown Redwood City and already is 100% [leased to Box, a young high tech company](#); and (c) [Alibaba](#), the Chinese internet commerce giant is [increasing its leased space in San Mateo](#).

HOUSING

Housing prices determine whether young families become established in the County or whether they seek other Counties to raise their children. Housing prices also affect older aged individuals who may wish to downsize their living space by moving into condominiums, townhouses, or managed living environments. Homeownership costs throughout the County are high meaning that young families may be unable to relocate to San Mateo County without sufficiently high levels of income typically brought about by accompanying high levels of education.

As the population ages in the County and as available land increases in cost, an increasing proportion of new construction will be in multi-unit structures. As the housing market—especially in places where rental costs are high—squeezes lower-income families' disposable income, the result is that family resources available for education and tuition may correspondingly decline, making it more difficult for the District to increase its penetration rate from a low-income, rental demographic.

COMMUNITY SUPPORTED STATUS

The San Mateo County Community College District is a "[community-supported or basic aid](#)" district unlike 66 of the 72 California community college districts that receive state aid through apportionment (general fund monies based on student enrollment). These 66 colleges are allocated state resources based on the Full Time Equivalent Student (FTES) cap number set in the State Chancellor's Office. Community supported means that when the State sets the District's revenue limit (determining how many students we are funded to serve) and deducts from that revenue limit

² California Employment Development Department. *Labor Force and Unemployment Rates for Cities and Census Designated Places*. Retrieved April 30, 2015 at http://www.labormarketinfo.edd.ca.gov/CES/Labor_Force_Unemployment_Data_for_Cities_and_Census_Areas.html#CCD

the local property taxes and student fees, there is no need for State apportionment to sum to our revenue limit. Property taxes, then, are the chief source of revenue in a community-supported district.

Community-supported funding for the San Mateo Community College District has risen independently of student enrollment, a result of increasing property values. The San Mateo County Community College District is not obligated to increase enrollment annually to increase revenues. The fundamental obligation of the San Mateo Community College District is to serve San Mateo County citizens irrespective of limits set by the state. The District's financial position provides opportunities to create new approaches to serve San Mateo citizens independent of state revenues and community college funding levels. At the same time, enrollment levels are an important barometer for assessing the vitality of the District's Colleges and the programs they offer.

ENROLLMENT AND STUDENT DEMOGRAPHICS

CHANGES IN ENROLLMENT

District enrollments have generally declined over the past five years (Figure 3) in tandem with [statewide community college enrollments](#) that saw 2.3 million fewer students enrolled from 2008-09 to 2012-13 due to reduced funding from the State. Statewide economic declines resulted in severe budget cuts to community colleges. Consequently, colleges cut back on courses and sections they offered. As a result of the voter-approved parcel tax, SMCCCD did not cut as severely as other colleges. As the economy recovered, SMCCCD's enrollment declined, as higher education enrollments traditionally decline as students pursue employment over college attendance. Changes in state policy in 2012 limiting the number of times that students may repeat classes in physical education, performing and visual arts areas also impacted SMCCCD enrollments.

Figure 5

During this same time, enrollment has shifted at Cañada College, College of San Mateo, and Skyline College (Figure 6). While all three Colleges have declining enrollment, Skyline College has had less consistent drops and CSM has seen the most percentage drop.

Figure 5

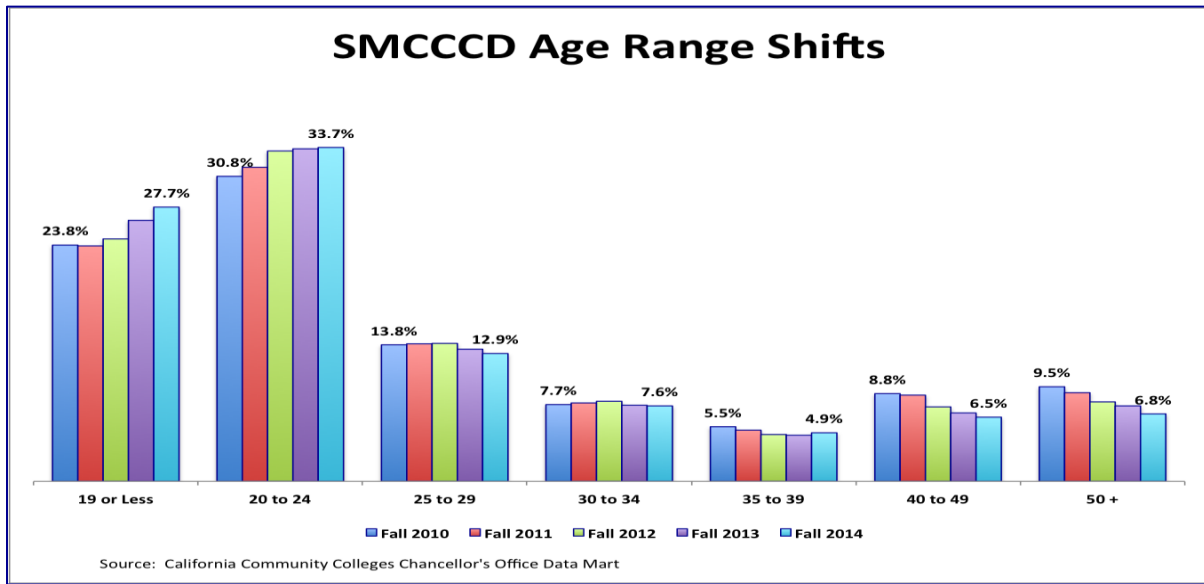

SHIFTS IN STUDENT DEMOGRAPHICS

AGE TRENDS

The District has become younger during the past five Fall terms (Table 5 and Figure 7) when the proportion of enrollment in Fall terms is considered. Older student age ranges have declined, perhaps the result of state policy changes noted above as well as an economy, while always healthy in San Mateo County, which has become even more robust. Increasing fees at CSU and UC may have shifted more high school graduates to community college as well.

| | Fall 2010 | Fall 2011 | Fall 2012 | Fall 2013 | Fall 2014 | Change Fall 2010 to 2014 |
|----------------------|-----------|-----------|-----------|-----------|-----------|--------------------------|

| % of Fall Total | 9.5 | 8.9 | 8.0 | 7.6 | 6.8 | -28.6 |

Figure 6

GENDER TRENDS

The District has become slightly but increasingly more male during the past five Fall terms (Figure 8).

Figure 7

ETHNICITY TRENDS

The District has become more racially and ethnically diverse during the past five Fall terms (Table 6). Hispanics and White Non-Hispanics constituted equal parts of the District's profile in Fall 2010. Since that time, the proportion of Hispanics has increased while White Non-Hispanics have decreased. Asian, American Indian/Alaskan Native, and Pacific Islander students have remained stable while there is an increase in students who identify themselves as Multi-Ethnic.

| | Fall 2010 (%) | Fall 2011 (%) | Fall 2012 (%) | Fall 2013 (%) | Fall 2014 (%) |

FINANCIAL AID TRENDS

While District annual enrollments have declined over the past five years, the proportion of students receiving financial aid has increased, indicating an upward shift in low-income students (Figure 9). Table 7 depicts the numbers of financial aid recipients by College over the past five Fall terms. The number of financial aid recipients increased most at Skyline College (n=2,556). CSM and Cañada College added 1,343 and 1,264, respectively.

Figure 9

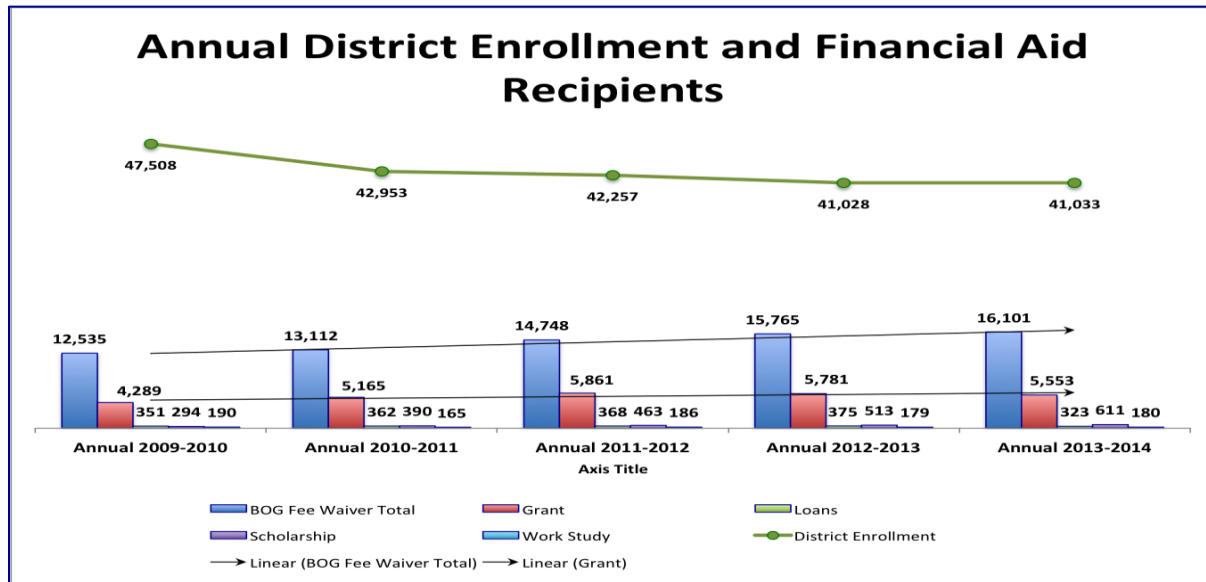

Table 7

SECONDARY SCHOOLS AND PENETRATION RATES

Figure 10 shows the recent upswing in high school graduates in the County through 2013-14 followed by a forecasted decline of 249 graduates in 2014-15. Whether the forecasted upward trajectory continues throughout the planning period is in question since state [population projections](#) suggest that the 15 to 19 year-old age range will decline slightly from 2015 to 2020.

Figure 10

Figure 11 shows that Hispanic or Latino graduates in the County surpassed White Non-Hispanic graduates in 2011-12. Higher birthrates among Hispanic citizens make it likely that this trend will continue.

Figure 11

Figure 12

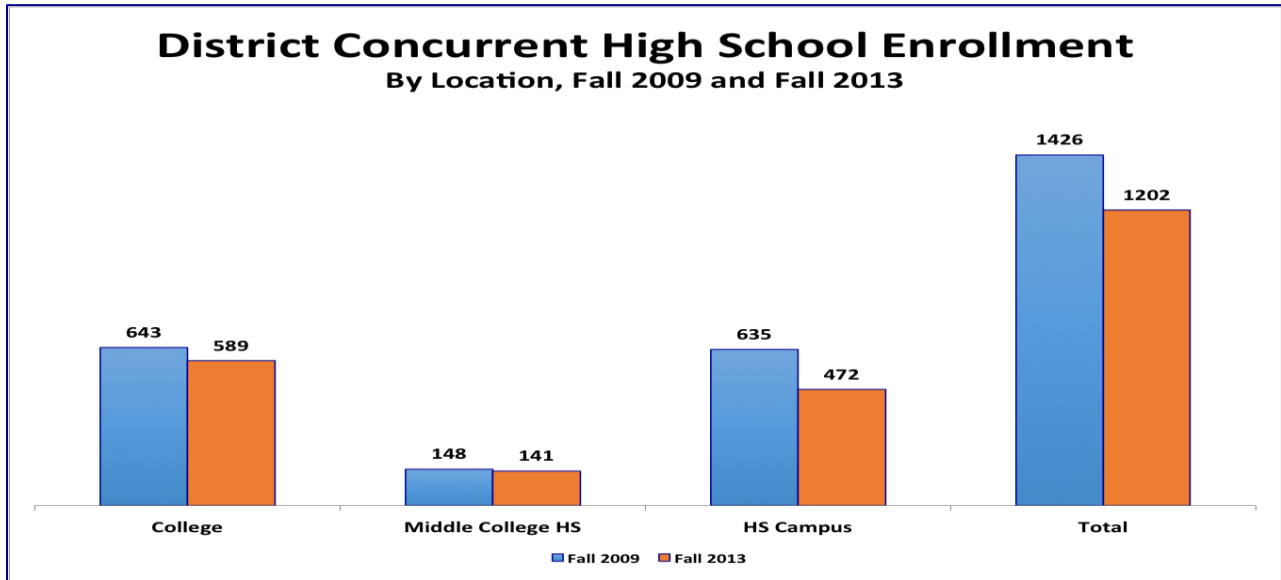

Figure 12 depicts the high school senior take-rate in the District over a five-year span. During this time span, 49.0% of the County’s high school seniors enrolled in one of the District’s Colleges.

HIGH SCHOOL STUDENT ENROLLMENT

Students enrolled in San Mateo County high schools can enroll in District classes at one of the three Colleges, at District-sponsored Middle College High Schools, and through classes delivered at their own high schools (Figure 13).

Figure 13

CONNECTIONS TO LABOR MARKETS

San Mateo County lies directly between and is a part of two dynamic employment centers, San Francisco to the north and Santa Clara to the south. Employment in this region grew even during the recent Recession and rapid growth is expected throughout the planning period. Employment growth in San Mateo County has been robust throughout the past several years while unemployment has come down steadily since early 2010. Many of the jobs in the County are in professional, scientific, and information sectors. The boom in information technology, e-commerce, media, and mobile technology has contributed to a healthy employment outlook.

As bright as the future looks for high-end jobs in the County, [recent research](#) shows that the Peninsula economy is no longer generating as many mid-range jobs as it once did while low-wage service jobs are multiplying. This gap is widening and the District can play a key role in providing workforce solutions by refining existing certificate and degree programs and creating new programs that lead to jobs not only in technology and related services but also in jobs in support fields. Working with business and industry partners, the District has [assessed employer demand](#) in these key areas: (1) accounting, (2) biotechnology, (3) digital arts, graphics and media, (4) health care, and (5) computer information systems. Changes in curriculum to match this research are underway.

A [labor market analysis](#) developed for the planning process documents the rise in low-wage service jobs in the region among jobs with the most openings. In fact, the top four jobs with the *most openings* are high turnover occupations that require only short-term on-the-job training. Other jobs are also low-wage and high turnover although they require a level of supervision for which the Colleges can prepare managers. Other occupations with the largest number of openings require postsecondary education and sometimes longer-term or intensive on-the-job training. These jobs should be a focus for the District's academic planning and include: Market Research Analysts and Marketing Specialists, Software Developers, Accountants and Auditors, Registered Nurses, Customer Service Representatives, Office Clerks, General and Operations Managers, and Food Preparation Workers. Of these occupations that are forecast to grow the most, Registered Nursing requires an associate degree for entry.

The *fastest growing* occupations for this same timeframe are skilled occupations and, to a large degree, are concentrated in the computer and technology sectors. The computer and technology sectors, including software application developers and systems software developers, will see annual employment increases between 48 and 57 percent; information security analysts, web developers and computer network architects will grow by 37 percent; computer and information systems managers is estimated to grow by 30 percent; network and computer systems administrators are predicted to grow by 40 percent; and multimedia artist and animators will grow by 38 percent. Nearly all of these jobs are linked to a bachelor's degree for entry, suggesting that a District academic planning focus should be on providing the first two years of applied study in these fields for transfer students as well as short-term classes and training for individuals already employed in these fields.

INSTRUCTIONAL PROGRAMS

BREADTH OF OFFERINGS AND TRENDS

The District provides an array of instructional programs across its three Colleges (Figure 14). Larger areas of instruction are in “traditional” college programs including humanities, mathematics, social sciences, education, psychology interdisciplinary studies, and business and management. The District also offers a range of career and technical programs that are smaller in scope including engineering and industrial technologies, health, public and protective services, architecture and environmental design, media and communication, and information technology.

Figure 14

Table 8 is an overview of program trends from Fall 2009 through Fall 2013. This table shows a decline in course enrollments of 6% Districtwide during this span, reflecting, in part, purposeful decisions made the District to reduce course sections and the 2012 state requirement to limit the

number of course repeats. Large program areas increasing the most were mathematics (89%) and humanities (31%). The three largest declines among large programs were interdisciplinary studies (-42%), business and management (-14%) and education (-11%).³ Smaller programs that grew the most were information technologies (39%), environmental sciences and technologies (13%), and health (5%). The steepest declines in smaller programs were in commercial services (-49%), foreign language (-46%), law (-35%), family and consumer sciences (-28%), architecture and environmental design (-21%), fine and applied arts (-19%), and public and protective services (-13%).

Table 8
District Instructional Course Enrollment Trends by Instructional Area

| Taxonomy of Program Areas | Fall 2009 | Fall 2010 | Fall 2011 | Fall 2012 | Fall 2013 | Size Fall 2013 | % Change Fall 2009 to Fall 2013 |
|---|-----------|-----------|-----------|-----------|-----------|----------------|---------------------------------|
| 01: Agriculture and Natural Resources | 70 | 39 | 58 | | | -- | n/a |
| 02: Architecture and Environmental Design | 146 | 123 | 137 | 109 | 116 | Small | -21% |

SCHEDULED CLASS TIMES

Figure 15 is the distribution of start times for Districtwide face-to-face classes showing that more than half of all classes (52%) are scheduled in the morning hours while afternoon (22%) and evenings (26%) account for the remainder. In general, District facilities have capacity for additional courses scheduled for the afternoon and evening hours.

Figure 15

Faculty Age Characteristics and Projections

There are 281 full-time teaching faculty and 41 other faculty (student services and librarians) in Fall 2014. Their average age is 51.4 years while average years of service is 12.0. The College of San Mateo is the oldest of the Colleges while Cañada College is the youngest in teaching faculty (Figure 16). [Analyses of faculty age ranges](#) and program assignment shows more specifically where future hiring needs are likely to emerge (Figure 17). Nearly 40% (112/281) of all teaching faculty are in the retirement zone. For example, all current Information Technology faculty are older than 56. Other programs with relatively high age distributions include: Business and Management, Engineering and Industrial Technologies, and Public and Protective Services. Future demand for instruction in a particular program area may not be static over time, a factor that could influence future resource allocations.

Figure 16

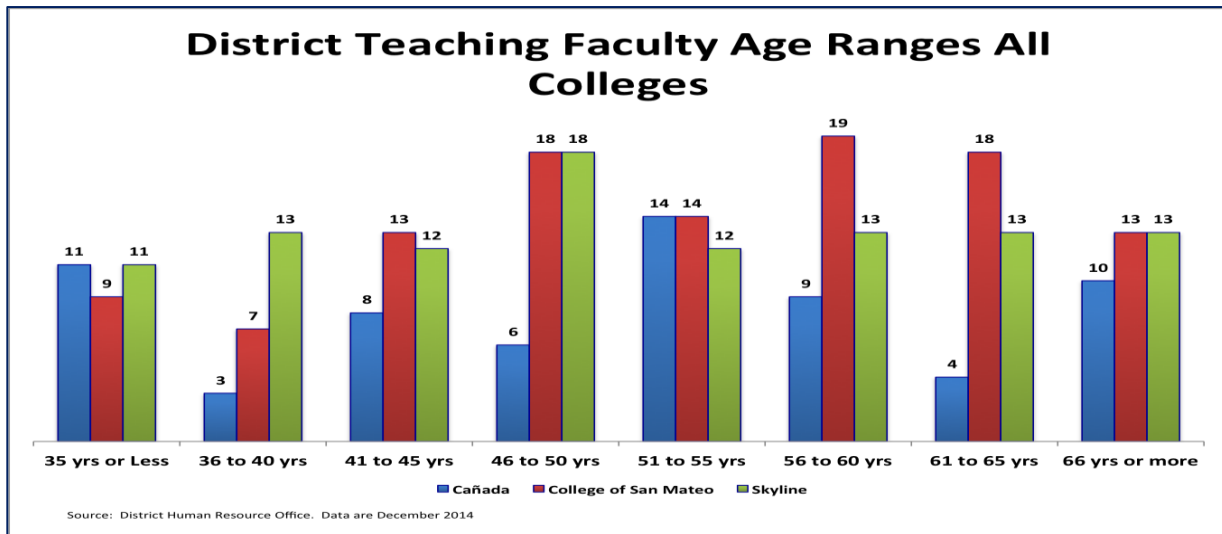

Figure 17

ONLINE INSTRUCTION

Ninety-three percent of all District courses are delivered in a traditional face-to-face instruction format. These courses may or may not have some online component. The remainder of District courses are available online (6%) or through hybrid delivery (1%), in which classes meet face-to-face and online (Figure 18). [Statewide, more than 12% of all community college courses are offered through distance education](#), and it is estimated that nearly half of all courses have some online component. Twenty-one percent of all District students enroll for at least one online course. The District is now working to create [XLOnline](#) courses that will expand the District's capacity for providing online learning by enrolling up to 100 students.

Statewide activity in online instruction is increasing. The [Online Education Initiative \(OEI\)](#) is near conclusion of its pilot phase. It is planned that all California Community Colleges will have access to online learning readiness modules and tutoring solutions for free or at reduced cost. There is also a professional development and collaboration component for faculty and staff.

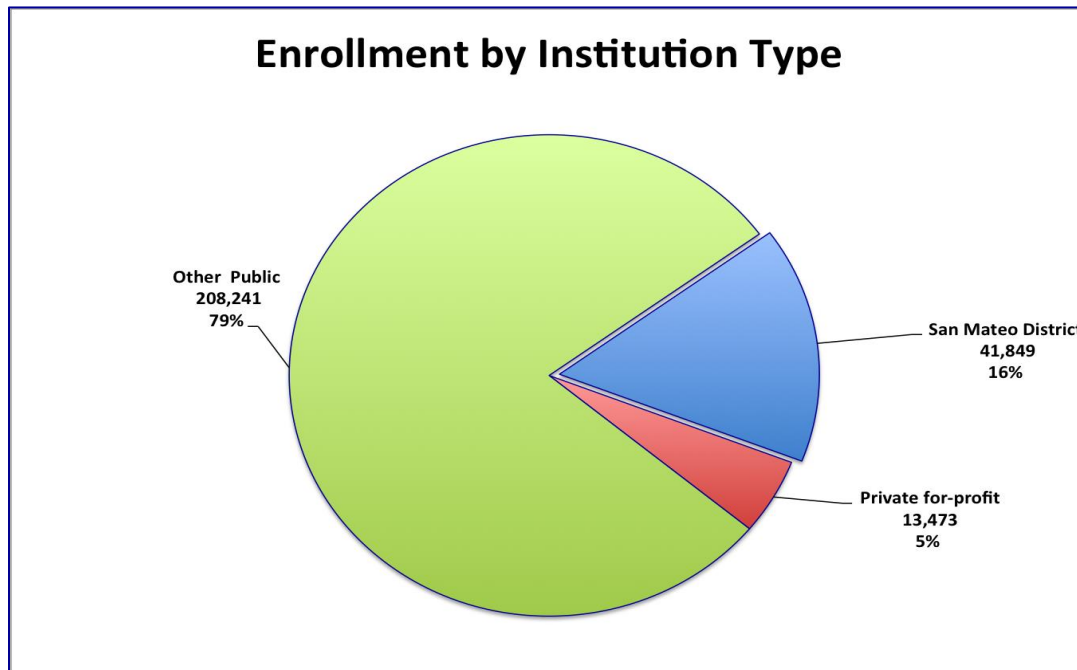

Figure 18

COMPETITOR ANALYSIS

The San Mateo County Community College District enrolls sixteen percent of all students attending public and private two-year colleges in a 25-mile radius of the County (Figure 19). Private-for-profit institutions in this radius enroll a much smaller share of total enrollment (5%). A [report documenting competing programs](#) reveals potential niches for new program development as well as places where the District's programs appear to be saturated.

Figure 19

For example, programs with no competition include⁴:

- Astronomy (CSM)
- Bilingualism and Biliteracy in English/Spanish (Cañada)
- Family and Consumer Studies (Skyline)
- Fashion Production (Cañada)
- Police Academy (CSM)

⁴ This program analysis does not include individual courses or clusters of courses. For public institutions, only those programs officially registered with the California Community Colleges Chancellor's Office were employed in the analysis.

District programs with one to three competitors in the 25-mile radius include:

- Administrative Medical Assisting (Cañada, Skyline)
- Alcohol and Controlled Substances (CSM)
- Computer Graphics and Digital Imagery (Cañada, CSM)
- Cosmetology and Barbering (CSM, Skyline).
- Dance (Cañada, Skyline)
- Earth Science (Cañada)
- Fashion Merchandising (Cañada, Skyline)
- Fire Technology (CSM)
- Fitness Trainer (Cañada, CSM)
- Geology (CSM, Skyline)
- Health Professions, Transfer Core Curriculum (Cañada, Skyline)
- Human Services (Cañada)
- Humanities and Social Sciences (Skyline)
- Interior Design and Merchandising (Cañada)
- Physical Sciences, General (CSM)
- Retail Store Operations and Management (Cañada, CSM, Skyline)
- Website Design and Development (Cañada, CSM, Skyline)

WORKFORCE ALIGNMENT

Alignment with workforce needs is central to the District's planning strategy. [Research](#) to support this planning process includes forecasts for the top 20 jobs predicted to grow the most as well as those predicted to grow the fastest in the District's geographical area.⁵ This research compares the availability of degree and certificate programs offered by two-year colleges or less throughout District's 25-mile radius with current District programming, labor force needs, and the number of completers.⁶ This analysis shows the San Mateo County Community College District's current alignment with labor market needs as well as opportunities to develop new certificate and degree programs in related areas.

⁵ See the District's strategic planning website for the [full report](#)

⁶ The District also addresses workforce needs by offering courses corresponding to those needs. This strategic plan specifically recognizes that not all learners are interested in completing degrees or certificate but may be interested in one or more classes to advance their skills. Official labor market projections, however, are developed on the basis of minimum levels of education (e.g., certificates and degrees) required for entry into specific jobs and are a solid basis for designing and improving pathways to employment.

The District also recognizes that not all students who enroll in its career and technical programs intend to complete a degree or certificate. Students who complete one or several courses or clusters of courses to advance their skills are a critical contribution to workforce alignment. As a key component of this plan's strategic goals (below), the District will create new research to document these successful outcomes for students and for its Colleges. Future employment demand requires at least some postsecondary education but may not automatically mean completion of a certificate or degree. Recent research on California's "[skills builders](#)," community college students who attend college to improve skills and not necessarily to earn a credential, shows increases in median wages for students who complete specific coursework, but do not complete a community college degree or certificate, nor transfer to a four-year institution. Statewide, skills builder students in 2011-12 enjoyed an earnings gain of \$5,100 or 15%.

Alignment in high skill areas also is a statewide concern at the baccalaureate degree level. Earlier in 2015, Skyline College's respiratory therapy program was one of twelve California community colleges selected to pilot a baccalaureate degree program by Fall 2016.

DISTRICT PROGRAM ALIGNMENT WITH LABOR MARKETS

The programs below offered by District Colleges are aligned with the top 20 jobs predicted to grow either the most or the fastest through the planning period.

- Audio and Video Equipment Technicians (CSM)
- Broadcast Technicians (CSM)
- Dental Assistants (CSM)
- Emergency Medical Technicians and Paramedics (Skyline)
- Firefighters (CSM)
- Hairdressers, Hairstylists, and Cosmetologists (CSM, Skyline)
- Health Technologists and Technicians, All Other (Skyline [Surgical Technology])
- Massage Therapists (Skyline)
- Paralegals and Legal Assistants (Cañada, Skyline)
- Radiologic Technologists and Technicians (Cañada)
- Registered Nurses (CSM)
- Respiratory Therapists (Skyline)
- Skincare Specialists (Skyline)
- Sound Engineering Technicians (CSM)
- Telecommunications Equipment Installers and Repairers, Except Line Installers (Skyline)

PROGRAM OPPORTUNITIES

The programs below represent the Top 20 jobs predicted to grow either the most or the fastest but for which the District currently does not offer programs.

- Aircraft Mechanics and Service Technicians
- Construction Managers
- Dental Hygienists
- First-Line Supervisors of Production and Operating Workers
- General and Operations Managers
- Heating, Air Conditioning, and Refrigeration Mechanics and Installers
- Licensed Practical and Licensed Vocational Nurses
- Life, Physical, and Social Science Technicians
- Manicurists and Pedicurists
- Nursing Aides, Orderlies, and Attendants
- Preschool Teachers, Except Special Education
- Veterinary Technologists and Technicians

STUDENT ACHIEVEMENT AND SUCCESS

Understanding student success and equity requires use of cohort analysis to gauge where students are progressing within institutions and where they are not progressing. Identifying bottlenecks in that progression is an important ingredient in strategic planning. As part of the current strategic planning process, a cohort of all entering students (n=3,807) in the Fall of 2009 was created and tracked through Spring 2014, a five-year timeframe.⁷

SUCCESS RATES FOR STUDENTS IN COURSEWORK

In this entering cohort, 1,163 entered remedial math, 401 entered remedial English, and 468 entered ESL/EOSL courses. Their success rate (passing with a grade of C or better) was 54%, 60%, and 59% respectively. Students who do not meet with success in developmental coursework most frequently do not return.

⁷ The Student Success Scorecard published by California Community Colleges Chancellor's Office provides an overview of the progress of defined student cohorts for the District but does not provide the District with a picture of all entering students.

GATEKEEPER CLASSES

Success rates in the first college-level course in English and math are 66% and 55%, respectively. These gatekeeper courses are required in all degree programs and many certificate programs and determine who progresses toward a degree, certificate, or successful transfer. Lack of success in developmental and gatekeeper courses carries negative consequences for students and for enrollment in the District's other courses at the 100 and 200 levels.

RETENTION RATES

The Fall 2009 to Spring 2010 retention rate was 75% while Fall 2009 to Fall 2010 retention rates were 61%.

DEGREE AND CERTIFICATE COMPLETION

Last, the cohort's degree completion rate during the four-year span was 12% and certificate completion was 8%. An upward spike in these rates would also be favorable for the District and for students.

Success rates can serve as a benchmark for the District's effort to increase student progression.

DEVELOPMENTAL SKILLS AND STUDENT SUCCESS

More than 2,000 course enrollments occur in three developmental areas Districtwide (Figure 20). A key to community college student success nationwide and in California is the progress students placed in basic skills make toward completing their basic skills courses, entering gatekeeper courses, and earning certificates, degrees, or successfully transferring. Short-term retention (Fall term to Spring term) and longer-term retention (Fall term to next Fall term) are also key measures of success for basic skills students. Figure 21 shows that throughout the District, 54% of students complete developmental Math courses with a grade of "C" or better while success rates for developmental English and ESL are 60% and 59%, respectively.

Changes in basic skills placement testing procedures are afoot in the San Mateo County Community College District. Recognizing that a single, "high stakes" test does not serve students or Colleges well, the District will investigate and implement multiple measures for placing students in basic skills classes when required. This imperative is experienced not only by the District, but is also a [statewide](#) concern.

Figure 20

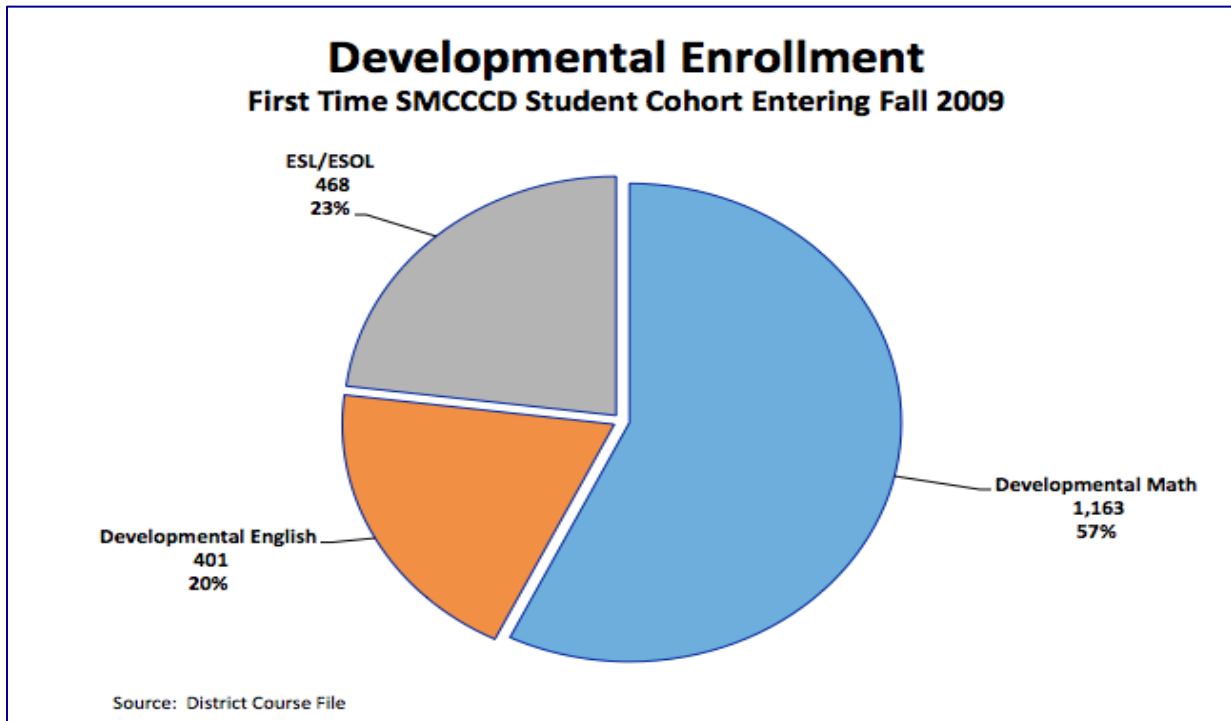

Figure 21

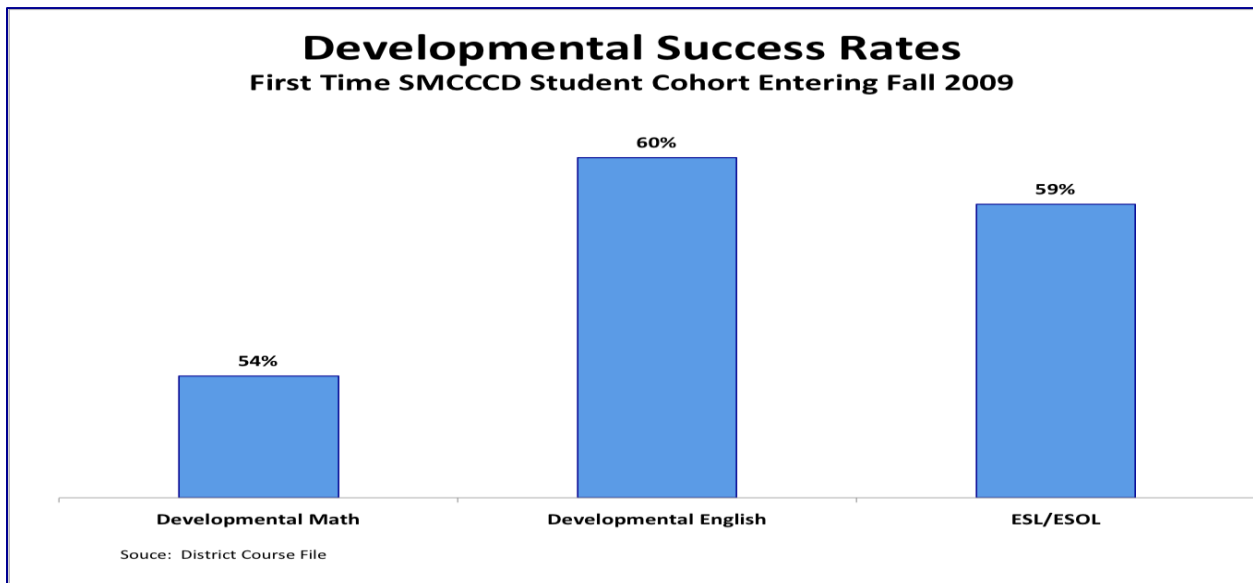

Figure 22

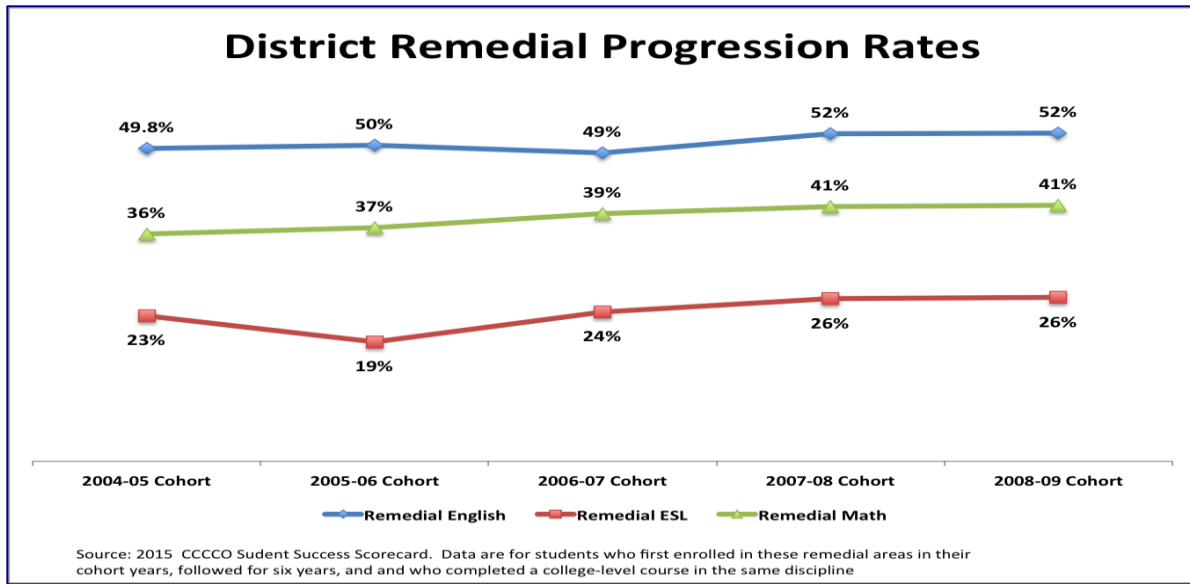

Figure 22 displays the proportion of entering students moving from basic skills to the next level college credit class for five cohort years of entering students. Figure 23 shows pass rates in District gatekeeper classes for the entering Fall 2009 cohort.

Figure 23

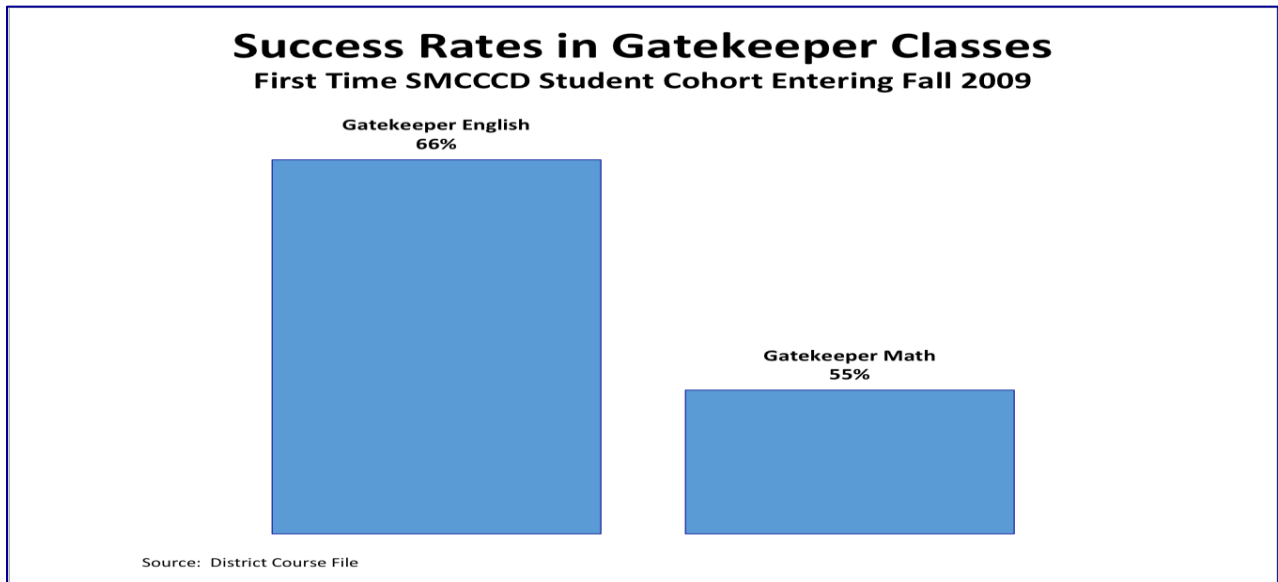

Figure 24

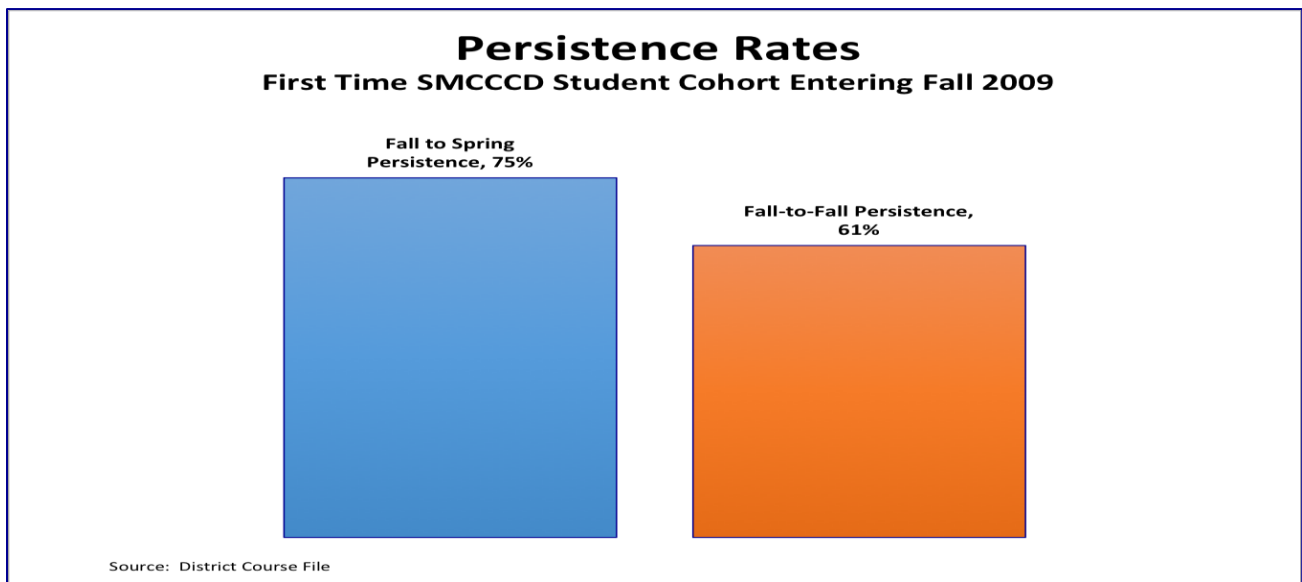

Figure 24 shows the persistence rate of the entering Fall 2009 cohort for Spring 2010 and Fall 2010. Figure 24 shows that 20% of the entering Fall 2009 cohort earned degrees (12%) or certificates (8%) by Spring 2014.

Figure 25

DEGREES, CERTIFICATES, AND NONCREDIT AWARDS

Figure 26 is an overview of degrees and certificates awarded by District Colleges. Appendix C provides a detailed list of degrees and certificates awarded by title.

Figure 26

TRANSFER TO THE UC AND CSU SYSTEMS

The District transfers more than a thousand students annually to the University of California and California State University Systems (Table 9). Within the CSU system, the largest transfer destination is San Francisco State followed by San Jose State and East Bay. In the UC System, Davis is the largest transfer destination followed by Berkeley. Figure 27 shows transfer numbers from the District's three Colleges.
